研究集会報告集

1978年9月7日 - 9月9日

研究代表者 藤本坦孝

目次

- 1. Surjective morphisms of holomorphic vector bundles..... 1 ✓

Université de Paris H. Skoda

- 2. Non-existence of bounded functions on the universal covering of  $\{\mathbb{P}^n - n+2$  hyperplanes in general position  $\}$  ( $n \geq 2$ )..... 4 ✓

Tokyo University of Agriculture and

Technology I. Wakabayashi

- 3. Some open problems in the study of noncompact Kähler manifolds .....12 ✓

University of California, Berkeley

H. Wu ✓

- 4. Families of linear systems on projective manifolds.....26

Tohoku University Makoto Namba

- 5. 開リーマン面の動きについて .....42

滋賀大 教育 山口博史

6. Brody's method in value distribution theory.....56 ✓

University of California, Los Angeles

M. L. Green

7. Riemann-Hilbert problem and its application to analytic  
functions of several complex variables.....60 ✓

Sophia University      M. Kita

8. Some geometric properties of compact complex manifolds  
uniformized by bounded domains in  $\mathbb{C}^n$ .....69 ✓

The Chinese University of Hong Kong

B. Wong
