Study on Some Phenomena Foretelling the Occurrence of Destructive Earthquakes

Contents

1. On Some Destructive Earthquakes Observed with the
Tiltmeter at a Great Distance.
by Eiichi Nishimura 1
2. On a Mercury Tiltmeter and its Application.
by Kennosuke Hosoyama 17
3. On the Local and Anomalous Change of Geomagnetic
Declination.
by Junichiro Miyakoshi 27
4. Investigation of the Structure of the Earth's Crust in
Relation to Local Earthquakes (Preliminary).
by Akira Kamitsuki and
Takeshi Mikumo 39
5. The Measurement of Radioactivity At and Below the
Ground Surface.
by Yoshi^r_^o Itô 49

Publications of the Disaster Prevention Research Institute

The Disaster Prevention Research Institute publishes reports of the research results in the form of bulletins. Publications not out of print may be obtained free of charge upon request to the Director, Disaster Prevention Research Institute, Kyoto University, Kyoto, Japan.

Bulletins:

- No. 1 On the Propagation of Flood Waves by Shoitiro Hayami, 1951.
- No. 2 On the Effect of Sand Storm in Controlling the Mouth of the Kiku River by Tojiro Ishihara and Yuichi Iwagaki, 1952.
- No. 3 Observation of Tidal Strain of the Earth (Part I) by Kenzo Sassa, Izuo Ozawa and Soji Yoshikawa. And Observation of Tidal Strain of the Earth by the Extensometer (Part II) by Izuo Ozawa, 1952.
- No. 4 Earthquake Damages and Elastic Properties of the Ground by Ryo Tanabashi and Hatsuo Ishizaki, 1953.
- No. 5 Some Studies on Beach Erosions by Shoitiro Hayami, Tojiro Ishihara and Yuichi Iwagaki, 1953.
- No. 6 Study on Some Phenomena Foretelling the Occurrence of Destructive Earthquakes by Eiichi Nishimura, 1953.
