CONTENTS

Section 1: Interfacial Turbulence and Air–Water Scalar Transfer

Turbulence and wave dynamics across gas–liquid interfaces .......................... 1
   J. Hunt, S. Belcher, D. Stretch, S. Sajjadi, J. Clegg

The calculation of the gas transfer between the ocean and atmosphere .......... 13
   S.A. Kitaigorodskii

The influence of wind wave breaking on the dissipation of the turbulent kinetic energy in the upper ocean and its dependence on the stage of wind wave development ........................................ 29
   S.A. Kitaigorodskii

Marvellous self-consistency inherent in wind waves — Its origin and some items related to air–sea transfers ................................................................. 38
   Y. Toba

Near surface turbulence and its relationship to air–water gas transfer rates ...... 51
   D. Turney, S. Banerjee

Turbulent gas flux measurements near the air–water interface in an oscillating-grid tank .......................................................... 65
   J.G. Janzen, H.E. Schulz, G.H. Jirka

Sensible and latent heat transfer across the air–water interface in wind-driven turbulence .......................................................... 78
   S. Komori, R. Kurose, N. Takagaki, S. Ohtsubo
   K. Iwano, K. Handa, S. Shimada

Rainfall-generated, near-surface turbulence ........................................ 90
   J. Beya, W. Peirson, M. Banner

Effects of the mechanical wave propagating in the wind direction on currents and stresses across the air–water interface .................. 104
   S. Mizuno
Section 2: Numerical Studies on Interfacial Turbulence and Scalar Transfer

Validation of Eddy-renewal model by numerical simulation .......................... 165
L.-P. Hung, C.S. Garbe, W.-T. Tsai

Mass transfer at the surface in LES of wind-driven shallow water flow with Langmuir circulation ................................................................. 177
A. E. Tejada-Martínez, C. Akan, C.E. Grosch

Characteristics of gas-flux density distribution at the water surfaces .............. 193
W.-T. Tsai, L.-P. Hung

Numerical simulation of interfacial mass transfer using the immersed interface method .............................................................. 200
P.G. Jayathilake, B.C. Khoo, Zhijun Tan

Statistical approximations in gas–liquid mass transfer .................................. 208
H.E. Schulz, A.L.A. Simões, J.G. Janzen

Section 3: Bubble-Mediated Scalar Transfer

An inverse approach to estimate bubble-mediated air–sea gas flux from inert gas measurements .......................................................... 223
D.P. Nicholson, S.R. Emerson, S. Khatiwala, R.C. Hamme
Experimental setup for the investigation of bubble mediated gas exchange …… 238
W. Mischler, R. Rocholz, B. Jähne

Gas transfer velocity of single CO₂ bubbles ........................................ 249
R. Patro, I. Leifer

Mass transfer across single bubbles .................................................. 262
K. Loh, K.B. Cheong, R. Uittenbogaard

Aeration of surf zone breaking waves ................................................. 273
N. Mori, S. Nakagawa

Section 4: Effects of Surfactants and Molecular Diffusivity on Turbulence
and Scalar Transfer

Modification of turbulence at the air–sea interface due to the presence
of surfactants and implications for gas exchange. Part I:
laboratory experiment ........................................................................... 285
A. Soloviev, S. Matt, M. Gilman, H. Hühnerfuss
B. Haus, D. Jeong, I. Savelyev, M. Donelan

Modification of turbulence at the air–sea interface due to the presence
of surfactants and implications for gas exchange. Part II:
numerical simulations ........................................................................... 299
S. Matt, A. Fujimura, A. Soloviev, S.H. Rhee

Wind-dependence of DMS transfer velocity: Comparison of model with
recent southern ocean observations ...................................................... 313
P. Vlahos, E.C. Monahan, B.J. Huebert, J.B. Edson

A laboratory study of the Schmidt number dependency of air–water
gas transfer ...................................................................................... 322
K.E. Richter, B. Jähne

On transitions in the Schmidt number dependency of low solubility gas
transfer across air–water interfaces ............................................... 333
X. Yan, W.L. Peirson, J.W. Walker, M.L. Banner
Section 5: Field Measurements

An autonomous self-orienting catamaran (SOCa) for measuring air-water fluxes and forcing
P.M. Orton, C.J. Zappa, W.R. McGillis

The 2009 SOPRAN active thermography pilot experiment in the Baltic Sea
U. Schimpf, L. Nagel, B. Jähne

Observations of air–sea exchange of N₂ and O₂ during the passage of Hurricane Gustav in the Gulf of Mexico during 2008
C.L. McNeil, E.A. D’Asaro, J.A. Nystuen

The effect of high wind Bora events on water pCO₂ and CO₂ exchange in the coastal Northern Adriatic
D. Turk, B. Petelin, J.W. Book

Seasonal sea-surface CO₂ fugacity in the north-eastern shelf of the Gulf of Cádiz (southwest Iberian Peninsula)
M. Ribas-Ribas, A. Gómez-Parra, J.M. Forja

Including mixed layer convection when determining air–sea CO₂ transfer velocity
A. Rutgersson, A.-S. Smedman, E. Sahlée

Air–sea carbon dioxide exchange during upwelling
H. Pettersson, K. K. Kahma, A. Rutgersson, M. Perttilä

Section 6: Global Air–Sea CO₂ Fluxes

Impact of small-scale variability on air–sea CO₂ fluxes
R. Wanninkhof, G.-H. Park, D.B. Chelton, C.M. Risien

The effect of wind variability on the air–sea CO₂ gas flux estimation
N. Suzuki, S. Komori, M.A. Donelan

Future global mapping of air–sea CO₂ flux by using wind and wind–wave distribution of CMIP3 multi-model ensemble
Y. Suzuki, Y. Toba

A Rumsfeldian analysis of uncertainty in air–sea gas exchange
M.T. Johnson, C. Hughes, T.G. Bell, P.S. Liss
Section 7: Advanced Measuring Techniques

Accurate measurement of air–sea CO₂ flux with open-path Eddy-Covariance ........................................ 485
O. Tsukamoto, F. Kondo

Combined Visualization of wind waves and water surface temperature .......... 496
R. Rocholz, S. Wanner, U. Schimpf, B. Jähne

Microscopic sensors for oxygen measurement at air–water interfaces and sediment biofilms ........................................ 507
B.C.G. Gonzalez, A.W. Lamon, J.G. Janzen, J.R. Campos, H.E. Schulz

Damping of humidity fluctuations in a closed-path system ......................... 516
E. Sahlée, K. Kahma, H. Pettersson, W.M. Drennan

Improved Optical Instrument for the Measurement of Water Wave Statistics in the Field ........................................ 524
D. Kiefhaber, R. Rocholz, G. Balschbach, B. Jähne

Friction Velocity from Active Thermography and Shape Analysis ................. 535
C.S. Garbe, A. Heinlein

Section 8: Environmental Problems Related to Air–Water Scalar Transfer

Evaporation mitigation by storage in rock and sand ................................. 545
W.L. Peirson, G.A. Lee, C. Waite, P. Onesemo, G. Ninaus

Development of oil-spill simulation system based on the global ocean–atmosphere model ........................................ 559
Y.J. Choi, A. Abe, K. Takahashi

Structure variation dependence of tropical squall line on the tracer advection scheme in cloud-resolving model ......................... 571
Y. Baba, K. Takahashi

High-resolution simulations for turbulent clouds developing over the ocean .... 582
R. Onishi, K. Takahashi, S. Komori

Author Index ........................................ 593
