

NISSAN CHEMICAL INDUSTRIES LTD.

Head Office: No.2 Honmachi 1-chome Nihonbashi
Chuō-ku, Tokyo

Branch Office: Dojima Bldg., 46 Kinugasa-cho
Kita-ku, Osaka

Factory: Hakodate, Komatsugawa, Oji,
Kinegawa, Toyama, Fushiki,
Nagoya, Kizugawa, Owada,
Onoda, Kagami.

Products:

- I Agricultural Chemicals
 - DDT Powder DDTWettable
 - DDT Emulsion
 - BHC Powder, BHC Wettable
 - 2·4-D 「Nissan」
- II Chemical Fertilizers
- III Industrial Chemicals
- IV Amino-acid Sauce

CAUSTIC POTASH, & OTHER CHEMICAL PRODUCTS

Fine and Accurate Analysis!

Shimadzu

POLAROGRAPH

Model: SH

For Determination of Organic Halogen Compounds such as BHC, DDT, etc.

Characteristics of Shimadzu Polarograph.

- (1) The main parts of our polarograph, i.e. galvanometer, standard cell and transformer etc., are all encased in a compact housing, so that the whole polarograph may require a little space.
- (2) The front panel and side panel are all made of thick black ebonite plate and the wiring is covered by vinyl chloride so that the insulation may be perfect. As a result of the above perfect insulation, you can work with the polarograph even in the dense moisture, such as of rainy days.
- (3) The experimental work with the apparatus require no dark room, excepting the handling of photo-recording paper, e. g. its

exchange and its developing.

- (4) The built-in galvanometer is very sensitive, so the results obtained are very accurate.
- (5) Turning the knob, you can easily adjust the indicating beam of galvanometer at any desired position on the scale, without moving the body of the apparatus.
- (6) Aided by the function of plus voltage supplying arrangement, polarograms of good accuracy ranging from $-4V$. to $+4V$. are made obtainable through a simple manipulation.
- (7) The installation of the motor to drive the potentiometer-drum or photo-drum is carefully made so that it may not exert any bad influence upon the sensitivity of the galvanometer.
- (8) The potentiometer-drum can be ran reversely through change-over of gears, while the motor does not.
- (9) The wiring is so arranged as to connect conveniently such auxiliary equipments as "Reducible device for magnitude of residual current", "Interfering arrangement for diffusion current" and "Voltage supplying arrangement".
