CONTENTS

1. Kikuchi, T. and T. Araki: Distortion of VLF radio wave field by vertical metal poles.	1
2. Nagano, H. and T. Inoue: On the FLR Kelvin-Helmholtz instability of the earth's magnetopause.	7
3. Asai, T.: Wind and thermal structures of the troposphere over the South-west Islands of Japan during January 1968 — A preliminary study for AMTEX—.	15
4. Kawahira, K.: A preliminary analysis on the horizontal scale of the winter absorption anomaly in the ionospheric D-region.	25
5. Yoshikado, H. and T. Asai: A numerical experiment of effects of turbulent transfer processes on the land and sea breeze.	33
6. Ohnishi, H. and T. Asai: A comparison of some schemes parameterizing cumulus convection by numerical experiments.	49
7. Imasato, N.: Study of seiche in Lake Biwa-ko (III) Some results of a numerical experiments by nonlinear two-dimensional model.	63
8. Kikkawa, K.: Contribution of ground water system to the distribution of geothermal state.	77
9. Yusa, Y.: The re-evaluation of heat balance in Lake Vanda, Victoria Land, Antarctica.	87
10. Satomura, M. and I. Nakagawa: Secular change of gravity near Lake Biwa-ko.	101
11. Sumitomo, M.: Geomagnetic variations in the vicinity of Tottori, facing the Japan Sea, in the South-western Japan.	117
12. Ozawa, I.: Estimations of the magnitudes of future earthquakes 129	129
13. Wada, T. K. Kamo and Y. Sudo: A characteristic occurrence of earthquake swams at the Aso Caldera-Rim.	145
14. Takeuchi, S.: Variation of elasticity in water-saturated rocks near the melting temperature of ice.	157
15. Watanabe, H.: Measurement of electrical conductivity of granite under high pressure.....	177
16. Adams, W. M.: Simulation of a Tsunami Warning System with Digital computer.	187
