## CONTENTS

Nagano, H.: On the effect of compressibility on the Kelvin-Helmholtz instability of the magnetopause. ....	1
Ogawa, T. and S. Otsuka; Comparison of observed schumann resonance data with the single dipole source approximation theories. ....	7
Ogawa, T. and Y. Murakami; Schumann resonance frequencies and the conductivity profiles in the atmosphere. ....	13
Maeda, S., S. Handa, T. Ogawa, K. Kawahira and T. Miura; Short period variations of atmospheric temperature and electrical conductivity in the stratosphere. ....	21
Mitsuta, Y., T. Hanafusa, N. Monji, O. Tsukamoto and T. Hayashi; Measurements of turbulent fluxes over a lake surface. ....	35
Fujita, M.; Dispersion patterns of river water in Lake Biwa. ....	53
Imasato, N., K. Tanaka and H. Kunishi; Study of seiche in Lake Biwa-ko (IV) —Observation with a new portable long period water level gauge—. ....	65
Kikkawa, K. and Y. Yusa; The concentration of bicarbonates in groundwaters passing through a hydrothermal field. ....	73
Ozawa, I.; Observation of the earth tidal extension at walferdange. ....	85
Ozawa, I.; The observation of the rotational strain, and relation to that of extensional strains in the earth tide. ....	93
Nishimura, K.; Characteristic features of focal mechanism in and near Kyushu Island (1).....	101
<b>Review</b>	
Ogawa, T.; Analyses of measurement techniques of electric field and currents in the atmosphere. ....	111
<b>Reports</b>	
Uchida, M.; Numerical calculation of tsunami propagation into Osaka Bay....	139
Ozawa, I.; Forecast of occurrences of earthquakes in the North-Western part of the Kinki district. ....	147
Sakai, A.; Investigations of a fine structure of the core—Mantle interface by diffracted SH Waves. ....	163
<i>List of Publications</i> .....	171
