Preface

The RIMS workshop “Algebraic Number Theory and Related Topics 2010” was held at Research Institute for Mathematical Sciences of Kyoto University from December 6 to December 10, 2010. The workshop was organized by Masanari Kida (University of Electro-Communications), Noriyuki Suwa (Chuo University) and Shinichi Kobayashi (Tohoku University).

The aim of the workshop was to overview recent developments in diverse branches of number theory: algebraic number theory, arithmetic geometry, automorphic forms and so on. The conference program included 27 talks in various areas of number theory and we had 161 participants during the conference. Two talks by Professors Arai and Ihara in the Wednesday session were dedicated to late Professor Fumiyuki Momose, who passed away on April 26, 2010.

This volume of RIMS Kôkyûroku Bessatsu edited by the three organizers is a collection of articles contributed by the invited speakers of the conference. They are divided into three categories: research announcements, survey articles and research articles for the convenience of reading and referring. Each paper was refereed by experts and is in final form.

The organizers would like to express their gratitude to everyone who contributed to the success of the conference and especially to the contributors and the anonymous referees of the articles of this volume who provided their excellent jobs on a tight schedule.
