1996年度 城山崎シンポジウム

11/12 (火)

- Y. Namikawa : Deformation theory of Calabi-Yaus 1-13
- M. Reid : 高次元の McKay 対応 14-41
- Y. Kachi : Flips from 4-folds with isolated complete intersection singularities and Leaning Tower 42-62
- S. Kimura : Does Chow group have a space structure? 63-73
- N. Sasakura : 超平面配置から生じるバネに束と反射層 74-78

11/13 (水)

- I. Nakamura : Compactification of the moduli of abelian varieties 79-102
- M.-H. Saito : Yukawa couplings of certain Calabi-Yau 3-folds 103-112
- N. Takahashi : Affine lines in open surfaces 113-118
- I. Shimada : Deformation of Picard-Lefschetz monodromy 119-134
- Y. Kawamata : Cone of divisors of Calabi-Yau fiber spaces 135-142

11/14 (木)

- D.-Q. Zhang : Automorphisms of small order on K3 surfaces 143-152
- J. Stienstra : Resonance in hypergeometric systems related to Mirror Symmetry 153-159
- D. Matsushita : On simultaneous partial resolution of toric singularity 160-167
- F. Kato : Moduli of log smooth curves 168-185
- H. Tokunaga : A remark on the Mordell-Weil groups of extremal elliptic K3 surfaces and Zauiski pair of index 19 186-197

11/15 (金)

- S. Usui : Recovery of vanishing cycles by log geometry : case of several variables 198-205
