Kyoto University
INSTITUTE FOR RESEARCH IN HUMANITIES

STAFF AND RESEARCH PROJECTS

April 2018–March 2019

ACADEMIC STAFF

DEPARTMENT OF HUMANITIES

Professors
Fujii, Masato, Ph.D. (U. of Helsinki), *Formation and Transmission of the Vedic Texts*
Iwaki, Takuji, D.Litt. (Kansai U.), *Japanese Society in the 19th Century*
Kagotani, Naoto, D.Econ. (Osaka City U.), *Asian Merchants’ Networks and Japan’s Industrialization*
Koseki, Takashi, Ph.D. (Hitotsubashi U.), *Modern History of Britain and Ireland*
Okada, Akeo, D.Litt. (Osaka U.), *European Music History in the 19th and 20th Centuries*
Sato, Junji, D.Litt. (U. of Tokyo), *Technology, Nature and (Post-)Modernity: A Philosophical Inquiry*
Takagi, Hiroshi, D.Litt. (Hokkaido U.), *Cultural History of the Modern Emperor System of Japan*
Takezawa, Yasuko, Ph.D. (U. of Washington), *Theories of Race and Ethnicity*
Tanaka, Masakazu, Ph.D. (U. of London), *Violence, Sexuality, and Religion in Modern South Asia, Japan, and Europe*

Associate Professors
Fujihara, Tatsushi, Ph.D. (Kyoto U.), *Reconstruction of Agricultural History*
Fuke, Takahiro, Ph.D. (Kyoto U.), *Social Movement and Social Thought in Modern Japan*
Ishii, Miho, Ph.D. (Kyoto U.), *Anthropological Study of Religion, Environment, and Corporeality in Africa and South Asia*
Ito, Junji, D.Litt. (Kyoto U.), *Bandits in Modern Transcaucasia, Especially Georgia*
Morigoto, Atsuo, Ph.D. (U. of Blaise Pascal), *French Symbolism and Literary Modernity*
Oji, Kenta, D.Litt. (U. of Paris-Ouest), *Historical Discourse and Political Thought in Early Modern Europe*
Setoguchi, Akihisa, D.Litt. (Kyoto U.), *Biological Sciences and Nature in East Asia*
Takashina, Erika, Ph.D. (U. of Tokyo), *Modern Japanese Arts and the West*
Tsukui, Kosuke, Ph.D. (U. of Paris VIII), *Considerations on Psychoanalytical Knowledge from the Perspective of the History of Thought*

Senior Lecturer
Holca, Irina, D.Litt. (Osaka U.), *Realism, Media, and Empire in the Works of Shimazaki Tōson and Other Modern Japanese Men of Letters*
Assistant Professors
Fujii, Toshiyuki, Ph.D. (Kyoto U.), Enlightenment and Literature: the Location of Humanity in Adorno’s Aesthetic
Ikeda, Sanae, M.A. (Kyoto U.), Land Ownership of the Japanese Imperial Household
Kikuchi, Akira, D.Litt. (Osaka U.), Socio-cultural History of Modern Japanese Ethnography
Ogawa, Sawako, D.Litt. (Waseda U.), History of Theatre and Film Arts in the 19th and 20th Centuries
Tanaka, Yuriko, Ph.D. (U. of Tokyo), History of Modern Medicine and Philosophy of the Body
Tokunaga, Yu, M.A. (U. of Southern California and Kyoto U.), Transpacific History of Interethnic Relations between Japanese and Mexican Immigrants in the United States

DEPARTMENT OF ORIENTAL STUDIES

Professors
Asahara, Tatsuro, Bronze Inscriptions of the Pre-Qin Age
Funayama, Toru, Scholastic Tradition and Practice in Indian and Chinese Buddhism
Ikeda, Takumi, Descriptive and Historical Study on Sino-Tibetan Languages in Southwest China
Inaba, Minoru, History of Early Islamic Expansion to the East
Inami, Ryooichi, Cultural History of the Qing Period
Ishikawa, Yoshiihiro, D.Litt. (Kyoto U.), History of the Chinese Communist Party
Iwai, Shigeaki, D.Litt. (Kyoto U.), History of Chinese Institutions
Okamura, Hidenori, D.Litt. (Kyoto U.), Archaeological Study of Ancient China
Takeda, Tokimasa, Chinese Science from the Perspective of the History of Thought
Wittern, Christian, Ph.D. (Goettingen U.), Knowledgebase for Buddhist Studies, with Chan-Buddhism as an Example
Yagi, Takeshi, D.Litt. (Kyoto U.), Bureaucracy in the Goryeo Dynasty
Yasuoka, Koichi, DEng. (Kyoto U.), Methodology of Character Codes

Associate Professors
Furumatsu, Takashi, The Multi-state System of Eastern Eurasia in the 10th to 13th Centuries
Inamoto, Yasuo, History of Buddhist Art in East Asia
Kogachi, Ryuichi, D.Litt. (U. of Tokyo), History of Commentary on Classics in China
Miyake, Kiyoshi, D.Litt. (Kyoto U.), Institutional History of the Qin and Han Dynasties
Mukai, Yusuke, Exploring Chinese Culture through Historical Archaeology
Murakami, Ei, D.Litt. (U. of Tokyo), Changes in Socio-economic Institutions in China during the Modern Era
Nagata, Tomoyuki, D.Litt. (Kyoto U.), Literary Theory in Medieval and Early Modern China
Nakanishi, Tatsuya, D.Litt. (Osaka U.), Historical Study of Islam in China

Assistant Professors
Fujii, Noriyuki, D.Litt. (Kyoto U.), History of the Bureaucratic System in Ancient and Medieval China
Fukutani, Akira, D.Litt. (Kyoto U.), Classical Hermeneutics of Neo-Confucian Schools in the Southern Song Period
Miya, Noriko, D.Litt. (Kyoto U.), Cross-cultural Exchanges in the Mongol Period
Morokawa, Tomohiko, Ph.D. (JAIST), Architecture of Text Representation Based on Information about Character Definition
SHIRASU, Hiroyuki, Ph.D. (JAIST), *Logical Investigations of the Object in East Asian Studies*
TAKAI, Takane, *History of Chinese Furniture*

**Program-Specific Assistant Professors**
MEGUCHI, Kyoko, Ph.D. (Kyoto Prefectural U.), *State Rituals in the Qin and Han Dynasties*
MORIKAWA, Hiroki, Ph.D. (U. of Tokyo), *Intellectuals and Politics in Republican China*

**VISITING SCHOLARS**

**Program-Specific Professors**
VITA, Silvio (Professor, Kyoto U. of Foreign Studies), *History of Ideas, Chinese and Japanese Buddhism* (Jul. 2007–)
FUJIMOTO, Yukio (Emeritus Professor, Toyama U.), *Korean Linguistics/ Bibliographical Studies* (Apr. 2012–)
IKARI, Yasuke (Emeritus Professor, Kyoto U.), *Study of the Vādhāila Śrautasūtra* (Apr. 2015–)

**Visiting Professors**
BIAN, Dongbo (Professor, Nanjing U.), *Studies on the Annotation to Tang and Song Dynasty Poetry by Japanese Zen Monks in Medieval and Early Modern Japan* (Feb.–Apr. 2018)
LI, Yuqun (Professor, Chinese Academy of Social Sciences/ Director of the Research Center for Frontier Archaeology and Center for Foreign Archaeology), *Study on Buddhist Caves in the Northern Dynasties* (May–Aug. 2018)
JUN, Yong Hoon (Associate Professor, Academy of Korean Studies), *A Comparative Study of the Introduction of Western Astronomy in Korea and Japan* (Aug.–Nov. 2018)
WALKER, Gavin (Associate Professor, McGill U.), *Post-68 Thought in Japan: Intellectual Historical Reinvestigations* (Mar.–May 2019)

**HAKUBI RESEARCHERS**
(Kyoto University, the Hakubi Project: http://www.hakubi.kyoto-u.ac.jp/eng/eng.html)

**Program-Specific Associate Professors**
AMANO, Kyoko, Ph.D. (Freiburg U.), *The Language and Socio-cultural Background of the Ancient Indian Ritual Literature*
MAK, Bill, Ph.D. (Peking U.), *Historical Transmission of Indian Astral Science in East and Southeast Asia*
Program-Specific Assistant Professors
Hiyama, Satomi, Ph.D. (Free U. of Berlin), Reconstructive Study on the Buddhist Culture in Central Asia on the Basis of Research on the Mural Paintings of Kucha
Uemine, Atsushi, Ph.D. (Doshisha U.), Reconstruction of Early Palaeolithic History Based on Novel Research Methods such as Lithic Observation, Excavation, and Dating

RESEARCH PROJECTS

JOINT RESEARCH CENTER

FORMATION OF JAPANESE ACUPUNCTURE-MOXIBUSTION: RECONSTRUCTION OF MEDICAL HISTORY IN MEDIEVAL AND EARLY MODERN JAPAN
(Coordinated by Hitoshi NAGANO, April 2018–March 2021)

In order to avoid oblivion in the wake of over-westernizing approaches, contemporary acupuncture and moxibustion studies focus almost exclusively on clinical research, and, while striving to preserve the tradition of medical ethics, tend not to take into consideration medical history. Even though in Japanese medical history acupuncture and moxibustion are often celebrated as the pioneering work that laid the foundations of modern medicine, very little attention has been paid to the pre-modern developments of various medical styles and theoretical discourses. Many treatises on these styles and theories still exist, such as the ones included the Fujikawa Collection at Kyoto University, but they have not been properly analyzed yet, and, as such, a great part of the technical aspects related to Japanese medical ethics remain unknown.

Our research project will comprehensively examine various old medical documents in order to shed light on the essential characteristics of the medical arts of acupuncture and moxibustion, their formation, and their transmission in the medieval and early modern Japan. We aim to establish a new field, “Japanese acupuncture and moxibustion studies,” and reconsider pre-modern medical history, while constructing the research infrastructure necessary for further investigations into the disciplines of acupuncture, moxibustion, medicine, and pharmacy.

RECONSTRUCTING POST WWII JAPANESE FILM HISTORY THROUGH ORAL HISTORY ARCHIVES
(Coordinated by Kenji TANIGAWA, April 2016–March 2019)

Film Studies in Japan tend to focus on textual analyses performed by researchers from various fields of the humanities, such as aesthetics or literature. The approach to films from the point of view of social sciences, such as studies of film industry, cultural systems, cultural policies, or the effect on the audience, is currently lacking. Before film started being understood as art, it developed as “show business” or as entertainment, and how a film was made, how it was shown to the audience, and how that audience received it are matters of equal importance as the textual analysis of the film. Researchers from the humanities usually focus on the film director or cinematographer, but the contribution of scripters, sword fighting choreographers, production designers, as well as distributors, publicity staff, theater staff, etc, to the film business should also be taken into consideration. The existence of the “movie fan,” as the subject at the receiving end of the film is also important. This research project aims to shed light on the characteristics of the development of film culture, focusing on its social and
economic aspects, through archiving the experience of the people who participated in the creation of film culture in various forms.

**FOUCAULDIAN STUDIES: REASSESSMENT AND NEW DEVELOPMENTS IN THE HUMAN SCIENCES**
(Coordinated by Yoshiyuki Koizumi, April 2017–March 2020)

At the center of Michel Foucault's colossal work, whose corpus is nowadays almost completed, one finds his attempts at a historical criticism of the “human sciences” originating in Western modernity. Foucault's work, which lies at the intersection of reviews of empirical research and philosophical speculation, has a wide political and practical range, which is not reducible to simple epistemology; it constitutes an indispensable reference in human and social sciences, the value of which is more and more important in today's world.

Yet, among the attempts to apply Foucauldian methodology in one's own field by either adopting or criticizing Foucault's position, those that analyze in depth the changes as well as the inherent consistency of his work are not numerous. Moreover, while Foucault's work is mainly examined from within the framework of the history of philosophy or the history of ideas, attempts at determining the significance of Foucault's own reexamination of the historical and contemporary movements in the different fields of “human sciences” remain rare.

The objective of this research seminar is to enable leading researchers in various fields of the “human sciences” to work together in order to bring out the significance of Foucault's work in its totality, and to determine the historical value and actual potential of Foucault's criticism of the “human sciences.”

**DEPARTMENT OF HUMANITIES**

**BRAHMANISM AND HINDUISM: CHANGE AND CONTINUITY IN SOUTH-ASIAN SOCIETY AND RELIGION**
(Coordinated by Masato Fujii, April 2016–March 2019)

Brahmanism and Hinduism, although the latter succeeded the former historically, have coexisted, mingled, and influenced each other as two fundamental religious and social systems in India. The present three-year research project intends to shed fresh light on change and continuity in South-Asian society and religion by studying the diachronic and synchronic relationships between Brahmanism, Hinduism, but also Buddhism and Jainism, which have kept a certain distance from the above-mentioned mainstream religions.

**CHAIN REACTIONS AND TRANSFORMATIONS IN THE MEANINGS OF RACISM IN ASIA**
(Coordinated by Yasuko Takezawa, April 2016–March 2019)

Most of the literature on racism has dealt with people of color as research subjects. However, racism in Asia cannot be explained within such a color-based paradigm. For example, racism exercised by “Japanese,” i.e., non-“whites,” involves the process and mechanism of racialization of physically invisible, but marginalized groups, by making a distinction between self and other through political, economic, and legal systems. Furthermore, this combines with the ambivalent gaze towards “white” Westerners, making racism in Asia multi-layered and complex. In this collaborative research project,
we study the process and mechanism of chain reactions and transformations affecting the meanings of racism in Asia, by examining intellectual and scientific discourses, popular culture, and other related materials, from a cross-regional perspective. This study also aims to contribute to “yellowness studies,” which have recently emerged as a counterpart of “whiteness studies.”

A STUDY OF THE VĀDHŪLA ŚRAUTASŪTRA
(Coordinated by Yasuke Ikari and Masato Fujii, April 2015–March 2019)

The main purpose of our project is the examination of the ritual manuals of the Vādhūla school of the Yajurveda, whose original manuscripts were discovered by the coordinator of this joint study in the Kerala State of South India. The texts of the Vādhūla school have previously been analyzed by scholars using only the secondary manuscripts available at the time. The discovery of the original manuscripts has drastically changed the situation, and we are now in a far better position to grasp an almost complete picture of the original texts of the Vādhūla school. We have been preparing an edition of the fundamental texts of this school, which scholars of Vedic philology are looking forward to.

In this joint study, we will comprehensively examine the texts of two significant rituals of the Vedic Śrautasūtra, i.e., the rituals of the Soma (Agniṣṭoma) and the Construction of the Fire-altar (Agnicayana). The former is the core of the entire Vedic ritual tradition starting from the Rig Veda, the oldest Vedic literature, while the latter represents the culmination of the history of Vedic culture, the social as well as cultural reformation and restructuring of the middle Vedic age.

Our research will be carried out by combining two types of studies: joint reading and examination of the manuscripts of the relevant portions of the Vādhūla Śrautasūtra (Chapters 6, 7, and 8) by all the members, and reports on important topics related to the rituals examined, made by the coordinators and the members. Our plan at the end of the project is to publish a critical edition and an annotated English translation of the three chapters of the Vādhūla Śrautasūtra mentioned above.

EXPLORING LIFE AND CREATION: THE STUDIES OF UMWELTEN
(Coordinated by Tatsushi Fujihara and Miho Ishii, April 2017–March 2020)

By focusing on the lives, skills, interactions, and boundaries of human and nonhuman beings, this research project explores a new field in the humanities. The German biologist Jakob von Uexküll put forth the idea of Umwelt, which denotes the unique and entwined relationships between a creature and its environment. This notion presents a novel perspective by which to pluralize the ‘natural worlds’ of creatures, thus criticizing the anthropocentric idea of a sole ‘world’.

The notion of Umwelt has provoked broad arguments in both the natural and the human sciences. The influence of Uexküll’s work can be found, for instance, in Viktor von Weizsäcker’s influential book Der Gestaltkreis and also in the work of Bin Kimura. Moreover, since the 1990s, we find an interesting common trend in various fields of the humanities: studies of the environment are flourishing in history; new approaches in human-nonhuman relations are developing in anthropology; and inquiries into human-animal relations and ethology are evident in philosophy. This development shows that the humanities have now broadened their reach beyond anthropocentrism and are proposing new perspectives for exploring the lives and lived worlds of both human and nonhuman beings.

This research project, based on both philosophical arguments and concrete case studies, investigates the comprehensive issues concerning life and Umwelten. It deals with various critical topics, such as
agriculture, natural and man-made disasters, mining developments, religious practices, illness and care, and scientific technology. Through a thorough investigation of the lives of, and interactions between human and nonhuman beings, as well as of their unique Umwelten, this project seeks to understand the ‘worlding’ of human beings as a part of life on the planet.

MODERN KYOTO AND CULTURE
(Coordinated by Hiroshi Takagi, April 2017–March 2020)

This research project will look at modern Kyoto and culture, examining their mutual relations. Kyoto, nowadays visited by more than 55 million people every year, is the most popular tourist city in the world. The city has often been described with expressions reminiscent of an elegant, aristocratic culture, such as “the place where the Japanese culture was born” or the paragon of “the culture of hospitality,” expressions which have also become the promotional lines for the relocation of the Agency of Cultural Affairs to Kyoto. Nevertheless, such images of Kyoto were clearly constructed politically and socially during the modern period. With this in mind, we would like to reconsider several topics concerning the culture of modern Kyoto, including the issue of marginality, the life of the common people, sexuality in the red-light districts, the problem of discrimination, etc. We will also investigate the political significance of culture and its relations to local communities. The project members, specialists in various fields, such as history, politics, education, social movements, economy, society, religion, knowledge, arts, cinema, literature, architecture, and garden design, among others, will step outside their areas of expertise to rethink the culture of modern Kyoto in a broader framework. Based on the results of collaborative projects that we have conducted so far, i.e., “Research on Modern Kyoto” (2003–05), “Research on Modern ‘Old Capital’” (2006–10), and “The Modern Emperor System and Society” (2011–16), we plan to approach the topic of locality from an interdisciplinary and critical perspective.

NARRATIVES ON VIOLENCE, RELIGION AND GENDER/SEXUALITY
(Coordinated by Masakazu Tanaka, April 2018–March 2020)

This project aims to analyze violence, religion and gender/sexuality in contemporary societies from an encompassing perspective, focusing on their narratives. Violence here ranges from military activities in wars to the oppression of minority ethnic groups or sexual minority groups, and from personal conflicts to sexual violence. First, this project deals with cases based on fieldwork carried out by each member. Secondly, the cases and the narratives surrounding them are analyzed from a comparative perspective. Thirdly, our research focuses on violence and oppression, as well as the control of religion and sexuality with reference to the extensive activities of states and international organizations. The project also explores the roles of the judicial system, medical practices and art works in overcoming social issues caused by violence, religion and gender/sexuality.

HUMANITIES IN THE 21st CENTURY: AN ATTEMPT AT UNDERSTANDING OUR AGE
(Coordinated by Akeo Okada, Takashi Koseki, Junji Sato, April 2018–March 2021)

This research project puts forth three chief aims.
1. The world we are living in is filled with a sense of helplessness. No one can predict its future. When and how was such a world fashioned? What are its essential qualities? Our project tackles these
questions from the viewpoint of ‘the crisis of the humanities.’

2. The project adopts a humanist approach, distinct from that of social science. What is central in such an approach is historical inquiry into the origins of ‘Our Age.’ The 1970s will doubtlessly be a focus.

3. The project places emphasis on the artistic aspect of ‘Our Age,’ given the fact that, along with ‘the crisis of the humanities,’ ‘the crisis of art’ is also a form of manifestation for ‘the crisis of human beings.’ The project will not only examine various artistic phenomena of ‘Our Age,’ but also attempt to forge meaningful partnerships with those artists who have been painstakingly engaged in artistic creation in such a helpless world.

The project adopts a sort of ‘triarchy’ structure. By appointing three leaders, Okada, Sato, and Koseki, each of whom has a different academic background, the project will aim to carry out genuinely inter-disciplinary studies.

A STUDY ABOUT THE FORMATION OF BUSINESS CIRCLES IN IMPERIAL JAPAN: 1895–1945
(Coordinated by Naoto KAGOTANI, April 2018–March 2021)

In the last half of the 19th century, Japan saw the transfer of power from the Tokugawa Shogunate to the imperial court, and the transformation from a system of government based on the bakufu domains to a unified state. This was also the period that witnessed the transition to a capitalist economy and the establishment of a modern Japanese state system. After the Meiji Constitution was promulgated in 1889, laying the foundations for the political structure of the state, Japan gradually became unified under the force of nationalism. Therefore, friction increased with Western countries that opposed Japan’s advances. In the Meiji period, Japan entered into the first Sino-Japanese War (1894–95) and the Russo-Japanese War (1904–05), and went on to annex Taiwan in 1895 and Korea in 1910. After these two wars, Imperial Japan emerged.

The Meiji leadership was assumed by men such as Ito Hirofumi and Yamagata Aritomo, who came from Choshu, and Matsukata Masayoshi, who came from Satsuma. Especially Matsukata brought to the government comprehensive financial skills. Although many positions were open to outsiders from other domains, the senior statesmen (genro) came from the Satsuma and Choshu circle. On the other hand, the Meiji government was still in a precarious position, faced with the runaway inflation incurred by printing an excess of paper monies. A campaign of retrenchment began under the direction on Matsukata, who devoted more than sixteen years of his career to Meiji finances. A new land tax and the campaign “Increase Production and Promote Industry,” the management of the currency, the establishment of the Bank of Japan (1882), and the adherence to the Global Gold Standard were all carried out under his direction. However, starting in 1886, government notes were converted to silver, and a silver standard was established. To help put an end to inflation, factories in the industrial sector, excluding strategic industries such as munitions, minting of currency, and communications, were sold off comparatively cheap to private businessmen, such as Mitsui and Mitsubishi. Close to government leaders and sharing their goals, these men emerged as leaders of future Zaibatsu, centered on the Japanese business circle. This Japanese business circle has been called Zaikai.

Our joint research project aims to analyze the role of Zaikai in Imperial Japan’s expansion until 1945. We will use primary materials, especially the diaries of Japanese businessmen. We will focus on the diaries of Tsutsumibayashi Kazue (Jakarta), Miyoshi Tokusaburo (Taipei), and Miwa Tunesaburo (Nagoya).
Zhang Xuecheng (1738–1801) was an eminent Qing Dynasty historian especially famous for the historical theory expressed in his magnum opus, On Literature and History (Wenshi Tongyi). The book clarifies the meaning of philological and historical writings in the Chinese culture from ancient times to the Qing Dynasty; thus, it should be read more closely, and from the standpoint of various disciplines.

To clarify the framework of On Literature and History, we shall employ a multifaceted approach and thoroughly translate its “Inner Part” into Japanese, with precise annotations. This series of translations will be published in the Tōhō gakuhō, Kyoto.

This research project examines the preservation and transformation of institutions such as customs, common sense, rules, orders, and behavioral patterns, that directed the Chinese society and economy during periods of transition (the period after the 1980s, the late Qing and the Republican period, and the late Ming and early Qing period).

China’s rapid economic growth during the last two decades, coupled with an increase in interaction among people, has brought these social and economic institutions to the fore. Despite the recent economic development, they are remarkably different from those in Europe, America, and Japan, a fact that has caused frictions between Chinese and foreigners. Therefore, in order to solve such frictions, it has become important to understand the above-mentioned institutions.

Simultaneously, studies on global history in the English-speaking world have stimulated interest in comparative economic history. However, these studies do not completely explain the “great divergence” between Western Europe and China after the 19th century, nor do they explain the “small divergence” between China and Japan after the middle of the 19th century. This is primarily because these studies do not fully understand the differences in social and economic institutions in China, Western Europe, and Japan, which make up the background of these “divergences.” As such, studies on social and economic institutions are becoming increasingly important.

With this in mind, our project analyzes the social and economic institutions in China during periods of transition, illustrating different models that explain these institutions.

In our recent research we have developed a method to analyze classical Chinese texts, which uses our original morphological analyzer based on MeCab. We have proposed a four-level word-class system for classical Chinese on the MeCab-based analyzer, and designed the top level of the word-class system to represent the predicate-object structure of classical Chinese. The second level is the ordinary word-class of classical Chinese, consisting of: “noun,” “pronoun,” “numeral,” “verb,” “preposition,” “adverb,” “auxiliary verb,” “particle,” and “interjection.” The third and fourth levels are word-subclasses describing the detailed behavior of the words in classical Chinese texts. We have excluded “adjective” from the
second level of our word-class system, without precisely examining the effect of lack of “adjective” for our morphological analyzer.

In this research project, we will examine the effectiveness of our four-level word-class system, focusing on the “verb,” “preposition,” “adverb,” and “auxiliary verb” classes in the second level. We will also examine the validity of the third and fourth levels of our word-class system.

INTERACTION AND ACCULTURATION OF KNOWLEDGE BETWEEN THE EAST AND THE WEST: A PAN-ASIAN APPROACH TO THE HISTORY OF SCIENCE IN ASIA
(Coordinated by Tokimasa Takeda, April 2017–March 2020)

In the pursuit of understanding nature, texts, artefacts, and cultural knowledge from foreign lands often play a stimulating role, and in some cases bring about major conceptual breakthroughs. In the case of China, the science and technology introduced from the “Western world,” i.e., India, the Islamic world, and Europe, had a profound, revolutionary effect. Through the Chinese intermediary, this body of scientific and technological knowledge was further transmitted to Korea, Japan, and Vietnam, where it underwent different forms of indigenization. In pre-modern Japan, while the influence of the new culture from China continued to be felt, scientific knowledge from the Jesuit missionaries and the Dutch was directly introduced. A unique hybrid of pre-modern Japanese scientific culture was thus formed.

This research project focuses on the Buddhist astronomy as exemplified by texts such as the Xiuyao jing, and the reception of “Western knowledge” during the late Ming and early Qing. By examining the formation and transformation of cosmology and theories on nature and life, we hope to shed light on the interaction between, and the acculturation of knowledge from the East and the West, in order to ultimately reveal the underlying structure of traditional Asian science from a pan-Asian perspective.

A STUDY ON MAO ZEDONG: FROM THE VIEWPOINT OF THE HUMANITIES
(Coordinated by Yoshihiro Ishikawa, April 2015–March 2019)

Mao Zedong’s importance has, at least on the surface, been wearing thin all over China after his death in 1976. In contemporary China, however, his legacy remains significant, affecting patterns of thinking in general, and has become a kind of icon of the anti-inequality sentiment among the people. On the other hand, the image of Mao as a commanding leader is shared by the current political leadership of China and determines the discourse about the history of the Chinese Communist Party. Although it seems that much ink has been spent on Mao, there are still many unanswered questions. In this research project, we shall investigate various aspects of Mao, mainly from the viewpoint of the humanities, focusing on his image in history, literature, art, and so on.

FRONTIER AND TRANSFRONTIER AREAS IN PRE-MODERN EURASIA
(Coordinated by Minoru Inaba, April 2015–March 2019)

Eurasia has been divided into several historical/cultural spheres since ancient times. We can, however, observe considerably vigorous interactions and exchanges across the frontiers/boundaries of these spheres even in the pre-modern period. It is almost certain that the trans-frontier activities, namely the activities that brought together various people, objects, and notions from beyond the frontier, provided each sphere with historical and cultural dynamism. However, it is not an easy task to explain why these
spheres were essentially divided and have been maintained as separate; this is a question that may be related to the fundamental structure of human society and culture. In this research project, we will address issues such as the physical background of the emergence of each historical/cultural sphere in pre-modern Eurasia, as well as how trans-frontier activities were made possible, employing viewpoints from various disciplines in order to contribute to the general understanding of the frontier.

STUDIES ON THE BUDDHIST CAVE-TEMPLES OF THE NORTHERN DYNASTIES
(Coordinated by Hidenori Okamura, April 2015–March 2020)

The Yungang Caves, located near the city of Datong in the Shanxi province in China, are a group of Buddhist cave-temples built in the latter half of the 5th century by the Northern Wei dynasty. Between 1938 and 1944, following the investigations of the Xiangtangshan Caves in the Hebei province and the Longmen Caves in the Henan province, the Research Institute of Oriental Culture, the predecessor of the Institute for Research in Humanities, Kyoto University, carried out investigations of the Yungang Caves and its neighboring sites. A report on these investigations was published in the form of the voluminous *Yunkang* (1951–1956), in 16 volumes and 32 fascicules, by Mizuno Seiichi and Nagahiro Toshio. This research seminar sets out to research the visual materials and field notes collected during the above-mentioned investigations, with the goal of systematically digitizing them, actively promoting the further use of these research resources, and making them available to the public.

SOURCES OF ANCIENT CHINESE HISTORY
(Coordinated by Tatsuro Asahara, April 2016–March 2019)

This is an introductory seminar for those interested in studying ancient Chinese history, especially the pre-Qin period. By reading basic articles and historical sources, participants will be able to develop their understanding and increase their knowledge on the topic. They are also expected to help each other to this end.

BUDDHIST SUTRAS AND DOCTRINES FOR CHINESE LAITY
(Coordinated by Toru Funayama, April 2016–March 2020)

Chinese Buddhism achieved various developments from the 4th to the 7th centuries, which were led not only by monastics, but also by the laity, for example emperors and literati. Questions such as: “How should we evaluate the quality of lay understanding of Buddhist doctrines?” or “What limitations did the laity’s understanding of Buddhist doctrine have?” can prove surprisingly difficult to answer. Building on the achievements of research on Chinese religion formerly conducted at this institute, the present project sets out to carefully read materials such as *The Expanded Collection for Glorifying and Elucidating the Law* (*Guang hong ming ji*, 7th c.), in order to come up with a clear picture of lay Buddhism.
A BIBLIOGRAPHIC RESEARCH ON OLD CHINESE BOOKS PREVIOUSLY HOUSED IN THE
KYOTO INSTITUTE OF THE ACADEMY OF ORIENTAL CULTURE
(Coordinated by Takeshi Yagi, April 2016–March 2021)

The Kyoto Institute of the Academy of Oriental Culture was established in 1929 using a grant-in-
aid from the Ministry of Foreign Affairs of Japan, and it has since developed into the Department
of Oriental Studies of the Institute for Research in Humanities, Kyoto University. The Institute has
inherited all the old Chinese books that were once housed in the Academy’s library; details of the col-
collection can be seen in the Catalogue of the Old Chinese Books published in 1938. This collection is well
known and highly valued in the academic world, particularly because it contains a series of books that
once belonged to Tao Xiang, a famous bookkeeper in Tianjin, China.

Our research project reexamines the information in the Catalogue and attempts to enhance the accu-
curacy of the KANSEKI database, an online catalogue based on the 1938 Catalogue. The project involves
the creation of an additional database of the prefaces and postscripts of the books. It will also involve
the collection of information about Ex-libris Ownership Stamps and their publication in pictorial books.
In the near future, as part of the celebrations of the 90th and 100th anniversaries of the Institute, exhibi-
tions will be held with the objective of reviewing and restructuring oriental studies in Japan.

FUNDAMENTAL RESEARCH OF THE KANSEKI REPOSITORY
(Coordinated by Christian Wittern, April 2016–March 2021)

The research seminar “Fundamental Topics in Digital Humanities” held from April 2013 to March
2016 produced as one of its results the preliminary release of a comprehensive repository of premodern
Chinese texts based on clear philological principles, called “KANSEKI Repository” (www.kanripo.org).
However, due to the limited time, only a very rough draft could be produced and some important texts
are still missing. This project will follow up on these results by improving the scope and descriptory
death of the texts and by developing exemplary methods for using the repository for answering spec-
cific research questions. Among these, support for the creation of text-critical editions and a general
survey of the characters used in the Repository are on the agenda, but the actual plan will be developed
by the members upon the start of the seminar.

STUDY ON THE EXCAVATED MANUSCRIPTS OF THE QIN DYNASTY
(Coordinated by Kiyoshi Miyake, April 2016–March 2021)

In 2002, city remains dating from the Zhangguo to the Han period were excavated near the village of
Liye, Longshan, Hunan province, and over 38,000 strips and boards were discovered. These strips com-
prise administrative documents dating from 222BCE to 208BCE. This suggests that the area around
Liye, a small mountain village located near the boundary of Hunan, Hubei, and Chongqing, was incor-
porated into the Qin administrative system after the unification carried out by the First Emperor. In
this project, we will examine these manuscripts closely, in order to shed light on the political system of
the early Chinese emperor.

In addition to the Liye discoveries, we will also analyze several Qin strips of unknown origin, which
had been smuggled to Hong Kong and recently (in 2003) repatriated by the Yuelu Academy of Hunan
University. Several parts of this material, including calendars and records of judicial processes during
the Qin, have already been published. Photos and transcriptions of the Qin statutes and ordinances
that were found among these strips will also appear soon. These materials will help us achieve the above-mentioned goal.

**BUDDHIST SCULPTURES AND INSCRIPTIONS FROM THE LONGMEN CAVES OF THE NORTHERN DYNASTIES**
(Coordinated by Yasuo Inamoto, April 2017–March 2020)

The Longmen Caves are one of the most important Buddhist sites in East Asia. In 1941, Mizuno Seiichi and Nagahiro Toshio from the Institute of Oriental Studies (now the Department of Oriental Studies, Institute for Research in Humanities) published the report “A Study of the Buddhist Cave-Temples at Lung-mên, Ho-nan” after conducting fieldwork in the area. The report remains relevant to all research on the Longmen Caves even today. In the 1950s, the two above-mentioned scholars also published a highly acclaimed series entitled *Yun-Kang: The Buddhist Cave-Temples of the Fifth Century A.D. in North China*, about the Yungang Caves.

Since the Qing Dynasty, there have been many studies about the enormous number of inscriptions carved in the Longmen Caves. After Mizuno and Nagahiro’s visit to the site, which was only six days long, many research topics were left for scholars to further discuss. In the development of archeology in postwar China, the comparative analysis of both textual and stylistic sources has generated new scholarly insights for future research. Yet, even within scholarship concerning the Northern Wei caves of Longmen, opinions remain sharply divided on fundamental issues such as the commissioning and the construction process of the caves and the dating of the major statues. Recently, the Institute of Oriental Studies has identified a rich collection of rubbings of the Longmen inscriptions. Our project therefore continues the Institute’s tradition of researching Buddhist cave temples, aiming to reorganize and make full use of the information gathered thus far and to reconsider the Northern Dynasties statues and their context. The project focuses on reconfirming the transcriptions of the inscriptions and understanding their contents. Based on the information gained in the first stage of our research, we shall consider issues such as the process of creating the caves and the style and iconography of the sculptures through a comprehensive study integrating art-historical, archeological, historical, religious, and social perspectives. In so doing, we hope to form a common foundation of knowledge that will serve as the basis for future Longmen studies.

**ASPECTS OF HISTORICAL DEVELOPMENT AND TRANSMISSION OF THE TIBETAN CIVILIZATION**
(Coordinated by Takumi Ikeda, April 2018–March 2021)

From the 7th century, the Tibetan civilization—its unique religions, rituals, languages, and social systems—gradually permeated the neighboring cultural areas via direct communications and trade. Our project compiles the results of interdisciplinary research carried out on the inter-cultural communication among these areas, reviewing and evaluating the aspects of the historical development and expansion of the Tibetan civilization in the Eurasian world. The Tibeto-Himalayan area, while influenced by preceding Asian civilizations, has developed a distinct civilization. The Tibet civilization grew stronger after assimilating Buddhism in the 11th–12th century, and by communicating with the neighboring cultural areas, it spread through Mongolia to East Asia. Moreover, its influence proved effective even in the modern European world of the late 20th century. How did the Tibetan civilization
maintain such power and flexibility? How did the Tibetan civilization come in conflict and how did it attain reconciliation with neighboring civilizations? How have elements of the Tibetan civilization been transmitted in modern society, even after the country itself ceased to exist? To find answers to such questions, we shall analyze the historical aspects and transmission of the Tibetan civilization from various academic angles.

WARFARE AND DIPLOMACY IN PRE-MODERN EASTERN EURASIA
(Coordinated by Shigeki IWAI and Takashi FURUMATSU, April 2018–March 2021)

In Eastern Eurasia, there have been constant exchanges and interactions between pastoral nomads of the eastern part of the Eurasian Steppe and settled agriculturalists of China proper. Northern pastoral nomads founded several powerful nomadic dynasties, based on a strong cavalry force, which was the most preeminent military technology in pre-modern times; they confronted the Chinese dynasties and even conquered China several times. Relations between pastoral nomads from the steppe and agrarian people of China were dynamic and diverse, including military conflict, domination, coexistence and fusion. They can be regarded as the basic patterns of Eastern Eurasian history. This project will focus on the Southern Song history book *Sanchao beimeng huibian*, which mainly deals with the diplomatic relations of the Song dynasty with the Jin dynasty of the Jurchen people during the first half of the 12th century, when the Jin dynasty established hegemony in the multi-state system of Eastern Eurasia. We will use the documents included in this book to analyze the characteristics of warfare and diplomacy between Nomadic dynasties and Chinese dynasties. In addition, we will examine the impact and influence of the Jin conquest of Northern China on the politics, society, and culture of China, including Northern China under the Jin and Southern China under the Southern Song.

A STUDY OF EAST ASIA IN THE THIRD CENTURY
(Coordinated by Shoji MORISHITA and Yusuke MUKAI, April 2018–March 2021)

The purpose of this project is to clarify the regional features of, and the relationships among the societies of China, Korea, and Japan in the 3rd century. In this age, after the collapse of the Han dynasty and the formation of the Three Kingdoms, the tribal societies of Korea and Japan had developed to the Chiefdom stage. *San-Guo-Zhi* describes these local societies and their changes in detail; also, the number of archaeological records of this area has been increasing recently. Through textual, historical, and archaeological studies, we will point out the significant role played by local societies in 3rd century Asian history.

CENTER FOR INFORMATICS IN EAST ASIAN STUDIES
47 Higashiogura-cho, Kitashirakawa, Sakyo-ku, Kyoto 606-8265 JAPAN http://www.kita.zinbun.kyoto-u.ac.jp/

The Center for Informatics in East Asian Studies (CIEAS) was established in April 2009 by reorganizing the former Documentation and Information Center for Chinese Studies. The overall mission of the CIEAS is to carry out information science research on East Asian languages and to make historical East Asian materials accessible to researchers through new media. A variety of databases, including the Catalogue of Old Chinese Books in Japanese Libraries, have been created and are constantly...
improved. The *Annual Bibliography of Oriental Studies*, which has long been published in book form, is now also available online.

**Research Center for Modern and Contemporary China (RCMCC)**

http://www.zinbun.kyoto-u.ac.jp/~rcmcc/index.htm

The Research Center for Modern and Contemporary China (RCMCC) was established in April 2007 through an agreement between Kyoto University and the National Institutes for the Humanities (NIHU), part of the Inter-University Research Institute Corporation. The main mission of the RCMCC is to carry out research on the fundamental structure of modern and contemporary China from the point of view of the humanities. Activities at the RCMCC are organized into two research groups: Research Group 1, which investigates the “Deep Structure of the Modern and Contemporary Chinese Culture,” and Research Group 2, which looks into issues concerning the “Social Foundation of the Modern and Contemporary Chinese Politics.” The RCMCC, as one of the research bases selected in the NIHU program focusing on “Contemporary Chinese Area Studies,” conducts projects in association with the other five research bases.
