OF THE
COLLEGE OF SCIENCE

UNIVERSITY OF KYOTO

SERIES B

VOL. XXXII, NO. 4

March 1966

KYOTO

CONTENTS

Geochemical Study of the Sambagawa Metamorphic System in the Besshi District, Central Shikoku, Japan Part III-B Post-metamorphic Hydrothermal Mineralization and Alteration of the Schists By Hiroshi TAKUBO.....	273
On the Anorthite Found in Lava Flow By Tateo UEDA and Masahisa TATEKAWA	285
Studies on Sandstones in the Maizuru Zone, Southwest Japan IV Gamma Irradiation Effect on Quartz and its Application to the Study of Provinces Tsunemasa SHIKI.....	291
On the Lower Cretaceous Fossils Found near the Ominé Mine, Iwaté Prefecture, Northeast Japan By Keiji NAKAZAWA and Masafumi MURATA.....	303
Kizekkyo Sandstone and Conglomerate of the Paleogene Muro Group in the Kii Peninsula, Japan By Takao TOKUOKA	335
Kambrische Conodonten von China Teil 1 Conodonten aus den Oberkambrischen Kushan-Schichten in China Von Yasuo NOGAMI.....	351
Molluscan Fossils from the Muro Group in the Southern Part of the Kii Peninsula, Central Japan. Part 1. By Eiji MATSUMOTO	369
Notes on <i>Elephas shigensis</i> (MATSUMOTO and OZAKI) from the Osaka Group and the Paleo-Biwa Group By Tadao KAMEI	381
Permian Brachiopod Fossils of Timor By Daikichiro SHIMIZU	401
Effects of the Natural Earth Currents on the Electric Potential Distribution on the Surface due to Underground Structure By Zin'tirô HATUDA	429
The Ryoke Metamorphic Zone of the Kinki District, Southwest Japan: Accomplishment of a Regional Geological Map By Hajime YOSHIZAWA, Waitsu NAKAJIMA and Kiyochi ISHIZAKA	437
