

**MEMOIRS
OF THE
FACULTY OF ENGINEERING
KYOTO UNIVERSITY**

VOLUME XVI

1954

**Published by the University.
KYOTO, JAPAN.**

CONTENTS

No. 1	PAGE
The Determination of the Ms Temperature by Dilatometric Method.	Hideo NISHIMURA and Toshishige MITANI 1
On the Temperature Difference between Inner and Outer Races of Rolling Bearings.	Tokio SASAKI and Shigeru ONO 9
Neue Versuche an Trocknungsapparaten.	Saburo KAMEI und Ryozo TOEI 14
No. 2	
Measurement of the Stress and Deflection of Kanzaki Bridge.	Masao NARUOKA 49
Studies on the Air Duct Ventilation with Leakage in Mines.	Yoshio HIRAMATSU and Junichi KOKADO 55
On the Characteristics of Air-Lubricated Bearing. (Succeeding Report)	Tokio SASAKI and Haruo MORI 71
Studies on the Creep of Low-Carbon Steel.	Toshio NISHIHARA Shūji TAIRA and Kichinosuke TANAKA ... 79
On Fundamental Equation of the Dynamical Behaviours of Nonlinear Visco-Elastic Bodies.	Yoshikazu SAWARAGI and Hidekatsu TOKUMARU ...100
No. 3	
Research of Resolving Power of the Electron Microscope.	Tokio INOUE113
Study on the Induction Method of Electrical Prospecting.	Takeshi KIYONO Koichi KIMURA and Keiichi KOBAYASHI147
Fundamental Research of the Superfinish.	Tokio SASAKI and Kenjiro OKAMURA157

Heat Transfer on the Surface of Parallel Plates in the Staring Range.	Sugao SUGAWARA and Takashi SATO.....	166
A Supplement to Investigation of Equilibrium Diagram of Fe-As-C System. (On Magnetic Transformation Point of Fe-As and Fe-As-C System).....	Hiroshi SAWAMURA and Toshisada MORI.....	182
No. 4		
On the Constitution on Zinc-ferrite.	Isao KUSHIMA and Tsuyoshi AMANUMA	191
Effect of Arsenic, Copper, Tin and Molybdenum on Impact Properties of Steels.	Hiroshi SAWAMURA and Toshisada MORI.....	205
Researches on the Fatigue Deformation.	Minoru KAWAMOTO and Kunio NISHIOKA	228
Continuous Production of Polyethylene on Semi-Industrial Scale.	Shinjiro KODAMA Isoji TANIGUCHI Sachio YUASA Tadanao OHTA and Yutaka TERADA	253
A Note on the Formula for the Psychrometer.	Suekichi KAWATA and Yoshirō ŌMORI	260
The Criterion for Instability of Steady Uniform Flows in Open Channels.	Yoshiaki IWASA	264
