

ACKNOWLEDGMENTS

Using my sabbatical leave and funds granted by my affiliated university, Aichi Prefectural University, I spent one year from 2024 to 2025 dedicating myself to my studies. I spent time in Canberra as a Visiting Fellow at the College of Asia & the Pacific, Australian National University (ANU), from April to June 2024. Subsequently, from August 2024 to March 2025, with support from the Center for Southeast Asian Studies (CSEAS), Kyoto University, I stayed at its Liaison Office in Bangkok. I want to express my sincere gratitude to everyone concerned about my one-year stay abroad, especially Shunichi Ishihara and Yasuko Kobayashi at ANU and Masayuki Yanagisawa, Yoshihiro Nakanishi, and Tomohiro Machikita at CSEAS.

Regarding the field studies in this paper, I am grateful to Chusak Wittayapak at the Faculty of Social Sciences, Chiang Mai University, for collaborating on and providing advice on my research in northern Thailand. I would also like to thank Nguyen Duy Can at the Department of Rural Socio-Economics, Can Tho University, for supporting my research in Can Tho, Vietnam. Finally, the authors are grateful to Vo Minh Vu at VNU University of Social Sciences and Humanities, Ha Noi, and colleagues at the Institute of Vietnamese Studies and Development Science, VNU Ha Noi, for their long-year support for village surveys in the Red River Delta.

Each study in this paper was supported by the Joint Usage/Research Center for Global Collaborative Research of the Center for Southeast Asian Studies, Kyoto University, the President's Special Research Grant of Aichi Prefectural University, and JSPS KAKENHI Grants-in-Aid for Scientific Research Nos. 20K20064 and 21H03707.
