Published three times a year (April, August and December) by

THE PHYSICO-CHEMICAL SOCIETY OF JAPAN

in the Department of Physical Chemistry,
Kyoto Imperial University, Japan.

More than ten years have passed since we first published in Japanese "The Review of Physical Chemistry of Japan". We flatter ourselves that this journal has made more than a little contribution to the Japanese chemical world. For there was no journal like this then, and even now none similar to this exists in Japan. In spite of many difficulties, we have reported over one hundred original papers.

In the new volume, with the support of various Japanese academic circles we have determined to enlarge our fields by including complete abstracts of Japanese physico-chemical literature so as to introduce the most recent developments of our chemical world, which are indeed startling.

We solicit your support in our future activities.

Shinkichi Horiba
Editor.
