

The Review of Physical Chemistry of Japan

Vol. 37, 1967

CONTENTS

No. 1

Kazuo Yasunami : A New Method of Determining the Transition Pressure of Mercury at 0° C as a Fixed Point of High Pressures	1
Jiro Osugi, Kiyoshi Shimizu, Kazuo Yasunami and Akifumi Onodera : Liquid-Solid Transition at High Pressure II, Monochlorobenzene and Toluene at 0°C.....	10
Ryozo Goto, Tsutomu Asano, Kiyoshi Matsumoto and Akira Sera : Organic Reactions under High Pressure I, Pressure and Solvent Effects on the Migratory Aptitude of <i>o</i> -Anisyl Group	16
Hironobu Kubota : Studies on the Kinetics of the Gas-phase Addition Reaction of HI to Butadiene I	25
Hironobu Kubota : Studies on the Kinetics of the Gas-phase Addition Reaction of HI to Butadiene II	32
Jiro Osugi and Muneo Sakaki : Kinetic Studies on Fast Reactions in Solution II, The Reaction between 1, 3, 5-Trinitrobenzene and Diethylamine in Acetone.....	43
Goro Morimoto : Physikochemische Untersuchung über die 6-Substituierten 2, 4-Diamino-1, 3, 5-Triazine	54
ADDENDUM :	
Tsunesuke Doi : Physico-Chemical Properties of Sulfur I, Pressure Effects on Viscosity of Liquid Sulfur	62

No. 2

The Late Dr. SHINKICHI HORIBA

H. Tracy Hall : High Pressure Apparatus: Ram-In-Tie-Bar Multianvil Presses.....	63
Jiro Osugi, Tetuo Mizukami and Tadafumi Tachibana : Optical Studies on the Effect of Pressure IV, The Effects of Pressure on the Keto-Enol Equilibria of Ethyl Acetoacetate and Acetylacetone.....	72
Jiro Osugi, Ryosuke Namikawa and Toshiyuki Tanaka : Chemical Reaction at High Temperature and High Pressure IV, High Pressure Phases in the Ge-P System	81
Jiro Osugi, Sigeru Kusuhara and Satoshi Hirayama : Kinetic Studies on Fast Reactions in Solution III, Photoreduction of Anthracene Derivatives.....	94
Hiroshi Komoto : Physico-chemical Studies of Polyamides I, Polyamides Having Long Methylene Chain Units.....	105
Hiroshi Komoto : Physico-chemical Studies of Polyamides II, Aromatic Polyamides Having Long Methylene Chain Units.....	112
Hiroshi Komoto : Physico-chemical Studies of Polyamide III, Isomorphism in Copolyamides of Long Chain Units Containing Oxa- and Thia-Alkylene Linkages.....	120
