PREFACE

7th SEASTAR

Dec.13-14,2006.

I am very glad to meet so many participants in this workshop. We reach our 7th SEASTAR and 3rd Asian Bio-logging Research Society joint workshop this year. The subjects are always focused on the aquatic endangered animals and their environmental conditions in ASEAN waters. All presentations in the workshop are developing and enrich in their contents year by year. Until up to several years ago, endangered aquatic animal behavior and habitat were hardly known since we could not easily observe their movements visually.

Since 2004, we have tried to make a joint workshop with the Asian Bio-logging Research Society to apply their recording system to analyze the underwater animal behavior. Fundamentally, their research system is based on a micro recording device or ultrasonic transmitter, attached to or inserted into the body. This system is the most suitable for endangered aquatic animal research since we can understand their behavior and migration over a long time without the use of any big research vessels.

In the first stage, SEASTAR workshop was focused on the research of the behavior of sea turtles as you know, and we discussed a plan of how to avoid incidental catch of turtles by fishing gear. In next stage, subjects were diverse. We included the research of dugong, Mekong giant cat fish and tuna as well as their environment. They are also endangered aquatic animals. Furthermore, this year we can include the environmental condition and accumulation of heavy metals around the coastal areas. These are very important problems not only for Thailand but also many other East Asian countries.

In the next stage, we wish to make a collaborative research among the countries and show our bio-logging technique to young scientists and students. We can demonstrate that aquatic animal behavior can be understood using these systems. After understanding the behavior, we will make an effective conservation plan. I hope, after 3 years, these processes will be established at our 10th anniversary SEASTAR workshop.

Wataru Sakamoto

CONTENTS

Page

Part I: SEA TURTLE

Research on interaction of sea turtle with pelagic longline fishery for its mitigation in the western North Pacific KOSUKE YOKOTA, HIROSHI MINAMI and TAKAHIRO NOBETSU	3
Deep setting of tuna longline hooks using mid-water system with long float lines to avoid sea turtle bycatch Michiru SHIGA, Daisuke SHIODE, Fuxiang HU and Tadashi TOKAI	9
Mating and nesting behavior of hawksbill turtle (<i>Eretmochelys imbricata</i>) in captivity MASATO KOBAYASHI, TOMOHITO SHIMIZU and KENZO YOSEDA	13
Dispersal movement of green turtle (<i>Chelonia mydas</i>) reared for one month after emergence JUNICHI OKUYAMA, HIDEAKI NISHIZAWA, OSAMU ABE, MASATO KOBAYASHI, KENZO YOSEDA and NOBUAKI ARAI	17
Implication of predation incidences by ant species on green turtle nests in Chagar Hutang, Redang Island MASAYUKI MORITA, ABU HASSAN AHMAD and CHAN ENG HENG	21
Vertical distribution of water temperature around female green turtles during internesting period TOHYA YASUDA, KONGKIAT KITTIWATTANAWONG, WINAI KLOM-IN and NOBUAKI ARAI	27
Establishment of biologging approach of sea turtle in the neritic environment KENGO KATAOKA, JUNICHI OKUYAMA, MASATO KOBAYASHI, OSAMU ABE, KENZO YOSEDA and NOBUAKI ARAI	31
Progress of marine species stranding rescue project at Phuket Marine Biological Center SONTAYA MANAWATTHANA	35

Part II: DUGONG	Page
Dugong (<i>Dugong dugon</i>) and seagrass in Thailand: present status and future challenges	41
KANJANA ADULYANUKOSOL and SOMBAT POOVACHIRANON	
Dugongs community initiated dugong conservation in Cape San Agustin	51
GLICETO O. DAGONDON, ABRAHAM D. UY, CAMELLA JANE FORTICH BOLLOZOS, BRIAN DARWIN LAWAS and JOSHUA DONATO	
The distribution of seagrass meadows and dugong feeding trails in the dry season around Talibong Island, Trang Province, Thailand	55
YOSHIEI NAKANISHI, SEIICHI HOSOYA, NOBUAKI ARAI, YOSHIKO NAKANISHI, KIYONORI KATSUKOSHI and KANJANA ADULYANUKOSOL	
Pattern analyses on the vocal structure of calls and geographic variations among three areas	63
NAOKO OKUMURA, KOTARO ICHIKAWA, TOMONARI AKAMATSU, NOBUAKI ARAI, TOMIO SHINKE, TAKESHI HARA and KANJANA ADULYANUKOSOL	
Effect of ship sound on the vocal behavior of dugongs	69
SHIMAKO SAKAMOTO, KOTARO ICHIKAWA, TOMONARI AKAMATSU, TOMIO SHINKE, NOBUAKI ARAI, TAKESHI HARA and KANJANA ADULYANUKOSOL	

Part III: FISH

Local knowledge of the Mekong giant catfish at the Sirikid Dam Reservoir, Northern Thailand	79
HIROMICHI MITAMURA, NOBUAKI ARAI, KOUKI NAKAMURA, NARUEPON SUKUMASAVIN and THAVEE VIPUTHANUMAS	
Possibility of position estimates for bottom-dwelling aquatic animals in a small scale using ultrasonic coded transmitters and passive monitoring receivers	83
YUUKI KAWABATA, JUNICHI OKUYAMA, KIMIO ASAMI, KENZO YOSEDA, KOTARO ICHIKAWA and NOBUAKI ARAI
