## Preface

This volume is a collection of papers presented at the symposium on mathematical economics sponsored by the Research Institute for Mathematical Sciences, Kyoto University, which was held during December 10~12,1999.

On behalf of the programme committee, I would like to extend my cordial thanks to all the participants of the symposium for their sincere and constructive contributions to our project.

We can safely say that mathematical reasonings have been playing a much more indispensable roles in economic theory than in any other discipline of social sciences. There seems to be several reasons which have endowed economic theory with peculiar mathematical characters.

First of all, many economic phenomena permit expressions in terms of quantitative languages.

We have also to take account of the fact that an economy consists of a huge number of sectors which are entangled in a complex manner. Economic phenomena result from the interactions of these interdependent component sectors. Their mutual relation is so complicated that an ordinary language and a casual way of thinking have only very limited abilities to describe and analyze economic phenomena. It is quite easy for anyone to imagine serious confusions which would result if we had recourse exclusively to ordinary languages and casual reasonings. Although mathematical reasonings may sometimes seem too round-about for our purposes, it certainly provides economists with simple and efficient analytical weapons.

Furthermore economists have been suffering from the difficulty of controlled experiments in their researches. That is exactly why much importance has been attached to rigorous speculative experiments in economic theory. So called "axiomatic method" developed in Vienna during the inter-war period should be regarded as being promoted by the same view and recognition under the influence of D.Hilbert.

I would be pleased very much if our symposium could contribute to widening and deepening of the mathematical foundations in economic theory.

研究集会報告集

1999年12月10日～12月12日  
研究代表者 丸山 徹 (Toru Maruyama)

目次

I. Presidential Address	
1. Optimal Entry and the Marginal Contribution of a Player-----1	
慶応大・経済	川又 邦雄 (Kunio Kawamata)
II. Analytical Foundations of Economic Theory	
2. CONVERGENCE THEOREM FOR THE PRODUCT YOUNG MEASURES WITH APPLICATION TO EXISTENCE OF BAYESIAN-NASH EQUILIBRIA-----27	
名大・経済	立石 寛 (Hiroshi Tateishi)
3. NEW EXTENSIONS OF THE K-K-M TYPE COVERING LEMMA WITH APPLICATIONS TO ECONOMICS-----36	
オハイオ州立大・経済	市石 達郎 (Tatsuro Ichiishi)
Polish Academy of Science	Adam Idzik
4. A Variational Problem Governed by a Differential Inclusion in a Banach Space-----59	
慶応大・経済	丸山 徹 (Toru Maruyama)
III. Aspects of Equilibrium Theory	
5. Stationary Markov Equilibria for Temporary Equilibrium Processes under Heterogeneous Expectations-----80	
阪大・経済学	武岡 則男 (Norio Takeoka)
6. An Optimal Cost Allocation Rule in General Equilibrium Models-----95	
東大・経済	神谷 和也 (Kazuya Kamiya)
7. Workers' Learning by Doing and Rigidity in Labor Markets-----110	
東大・経済	西村 清彦 (Kiyohiko G. Nishimura)
東大・経済学	玉井 義浩 (Yoshihiro Tamai)
IV. Dynamic Macro-economic Theory	
8. SOLUTIONS FOR SOME DYNAMIC PROBLEMS WITH UNCERTAINTY AVERSION-----129	
東北大・経済	尾崎 裕之 (Hiroyuki Ozaki)
Univ. of Western Ontario	Peter A. Streufert

9.	Indeterminacy in Two-Sector Models of Endogenous Growth with Leisure-----	141
	神戸大・経済	三野 和雄(Kazuo Mino)
1 0.	Investment Decisions and the Choice of Technique of the Firm under Imperfect Competition-----	157
	神戸大・経済	足立 英之(Hideyuki Adachi)
1 1.	On the Global Stability, Dynamic Trade Patterns and Asset-Debt Positions of the Two Country, Two Good Endogenous Growth Model with Adjustment Costs of Educational Investment-----	175
	筑波大・社会科学系	井上 正(Tadashi Inoue)
V. Mathematical Finance		
1 2.	A Filtering Model on Default Risk-----	199
	東大・数理科学	中川 秀敏(Hidetoshi Nakagawa)
1 3.	Quantile Hedging for Defaultable Securities in an Incomplete Market-----	215
	阪大・基礎工学	関根 順(Jun Sekine)
VI. Game Theory		
1 4.	KINSHIP-RECOGNITION AND SELF-SACRIFICE IN PRISONERS' DILEMMA-----	232
	慶応大・経済	中山 幹夫(Mikio Nakayama)
1 5.	Communication leading to Nash equilibrium-----	245
	茨城工業高専	松久 隆(Takashi Matsuhisa)
VII. Historical Perspective		
1 6.	Cournot's Economics and the Tradition of Social Mathematics-----	257
	防衛大学校	武藤 功(Isao Mutoh)
