

THE SCIENTIFIC LECTURES OF THE INSTITUTE FOR VIRUS RESEARCH

Date: February 15 (Kyoto University Hall)

Opening Remarks: Ryoichiro Kageyama

1. Molecular mechanism on replication and transcription of viral genomes. Kyosuke Nagata, Graduate School of Comprehensive Human Sciences, University of Tsukuba
2. Regulation of viral replication by host factors. Kunitada Shimotohno, this Institute
3. Mechanism of divide between chromosomal and plasmid DNA in E. col. Sota Hiraga, Graduate School of Medicine, Kyoto University
4. Together with See Y. Koreaki Ito, this Institute

Date: June 27 (Kyoto University Hall)

Opening Remarks: Ryoichiro Kageyama

1. Fate determination of non-coding RNA in RNAi-dependent heterochromatin formation. Yota Murakami, this Institute
2. Function, biogenesis and modification of piRNAs in Drosophila. Mikiko Siomi, The University of Tokushima
3. Quality control and functional regulations of membrane proteins by membrane proteases. Yoshinori Akiyama, this Institute
4. Dynamics of function and control of endoplasmic. Kazutoshi Mori, Kyoto University
