FIRRO AND SLUFAY: THE TRADITIONAL LITANIES OF THE IRAQW

W. D. KAMERA
Narok University

ABSTRACT The poetic appeal and potential of Firro and Slufay have often been alluded to but not rigorously studied owing to the inavailability of reliable texts of a certain or desirable magnitude. This paper attempts, among other things, to provide such texts to enrich the already existing materials and to stimulate further research.

The discussion of the qualities and procedures of this genre of Oral Literature is slanted towards seeing Firro and Slufay as communal poetry of the Iraqw which springs from and continues to be fuelled by their traditional litanies.

Key Words: Oral literature; Poetry; Traditional litany; Iraqw; Tanzania.

INTRODUCTION

Topographically the Iraqw make the eastern escarpment of the Rift Valley and the troughs of Lake Eyasi and Lake Manyara their natural borders. More significantly, the Barabaig and the Gorowa to the south east, the Mbugwe to the east, the Hapzapi to the north west, the Masai to the north and the Nyaturu to the south are their neighbours.

Scholarly doubts and controversy still hover over the origin and presence of the Iraqw in Northern Tanzania. With varying degrees of success, a few studies have plausibly described and accounted for the presence of the Iraqw neighbours but on the Iraqw they are impressively vague. Ethnically the Iraqw comprise of the Gorowa, Alawa, Bulungi and the Mbugwe. Cultural historians, however, have enthusiastically concluded that Aya Iraqw (the Land of the Iraqw) and its precincts, “with its Khoisan, Cushitic, Nilotic and Bantu speaking populations, is the most linguistically diverse on the whole African continent” (Temu & Kimambo, 1969). Not only are the Iraqw surrounded by linguistic controversy, they are also shrouded in eugenic speculation.

The impression that the Iraqw...make on the visitor of being a distinct physical as well as a linguistic type has led to much speculation on their affiliations and origins. In the past, the whole group was largely referred to as Hamitic, but it is doubtful whether adequate material existed to justify such a label. Some phonetic and grammatical features seem to invite comparison with Hamitic or Semitic languages, but these are inconclusive, and up to the present there is no clear evidence of affinity with any of the larger linguistic classificatory groups” (Whiteley. 1958).

Linguistics experts and enthusiasts, unable to resolve their disagreements, consign the Iraqw to the linguistic limbo of the Khoisan and the Southward Cushites, then tenuously proceed to trace their legendary southward trek from the Middle East into

Ethiopia and the Eastern Horn, from where they dispersed to East Africa following the Rift Valley and keeping close to the source of water.

The Iraqw themselves, however, believe they all came in waves from a place called Mangwatay which, though unidentified, is in Kondoa Irangi in central Tanzania and settled under the shadow of Mount Hanang from where they have scattered to their present homesteads which constitute Aya Iraqw (Land of the Iraqw).

They are an agrico-pastoral people, and it is of interest and value to examine how the pastoral and the agrarian elements are related in their day to day activities (Yoneyama, 1970). Cattle have a special place in the culture of the Iraqw. Most of their ritual observances involve ceremonial killing of livestock for communal meals. Milk is an important item in the people's diet, and cow dung is needed for ritual as well as agricultural purposes.

The annual crops of the Iraqw are cereals and legumes. They cultivate beans, maize, sorghum, potatoes, millet and eleusine. Their annual calendar indicates that they are strongly attached to the soil, but their daily schedule is dominated by pastoral activities.
ASPECTS OF TRADITIONAL RELIGION

The Iraqw venerate three kinds of supernatural beings. These are the supreme goddess, *Loa*, the malevolent terrestrial spirits, *Netlang’w*, and the living-dead, *Muk Yamu*.

*Loa* is the source of life and the moulder of the land and the sky. *Loa* illuminates the world with the light of the sun, and opens the dome of the sky for her blessings to flow to the earth in the form of rain. *Loa* is responsible for the steady flow of the universe and for the smooth changing of the seasons as well as the folding and unfolding of day and night. Her transcendent powers are manifested through natural phenomena like storms, floods, and when she is in high spirits and chooses to play on her drums, mortal ears register thunder, whereas when she surveys the day’s work to see if anything has been left unaccomplished, the Iraqw see lightning.

The Problem of Evil

In the beginning, *Loa* had a helper who was known as *Netlang’w* and the two were great friends. *Netlang’w* being junior to *Loa* was her helper and agent, but it is not known for certain just about when *Loa* moulded *Netlang’w* remained obedient and dutiful to *Loa* until *Loa* created man. When time came for a decision to be made concerning the destiny of man, a dispute ensued. *Netlang’w* wanted not only to share in that destiny but also to control it. *Loa* refused and *Netlang’w* rebelled and was banished from *Loa*’s courtyard and cast into the Ocean. Consequently *Netlang’w* became the enemy of *Loa* and also of man. *Netlang’w* crawled like a snake and came close and started to molest man. *Netlang’w* dug furrows from the ocean and the lakes and directed them to the homesteads on the ridges. Consequently life for man became an endless strife with *Netlang’w*. Thus all epidemics, sudden and premature deaths are attributed to *Netlang’w* and his cohorts. *Netlang’w* is thought of as a heavy footed aquatic beast and is responsible for droughts, drying up of water holes, streams and wells. Apart from causing natural catastrophes, *Netlang’w* spreads and intensifies epidemics and promotes malignant diseases upon human and livestock.

It is also known all over Aya-Iraqw that witches cannot carry out their activities without the aid of *Netlang’w*. If a family is struck by a catastrophe, a diviner is consulted to prescribe the measures to be taken to repel *Netlang’w*. Usually they throw *Maaye*, bitter fruits, in his direction. If this fails, the family vacates the homestead.

*Muk Yamu*: The Living-Dead

These are spirits of the dead. Some of the rites which are directed to the spirits of the dead are not communal observances but are restricted to the family. For example, a window may offer sacrifice to the spirit of her husband to avert misfortune.

*Slufumis*: Worship

Usually individual households at time perform and participate in special rites in connection with new harvest, first milk or first brew from fresh eleusine. The following are some examples.
a) New Milk  The first milk is not used for human food before proper rites are performed. In the morning following the birth of the calf, masao, first milk, is taken in a container by an elder who stands near the threshold with his back to the house and starting from the right-hand side of the entrance sprinkles milk two times accompanying the act with the words, “Muk dore o dori no yamu oo ta baraqawan” (Let our heavenly and earthly people receive this milk).

After this the scene shifts to the ufa, -cow dung heaps. and the same rite is performed stating with the right hand side ufa. Finally the container is emptied at the door. Thereafter the rite is repeated at the door but without the accompanying words whenever milk is brought into the house.

b) Dii (Butter)  The first butter is put in a clean container and a certain amount is thrown towards the sun using the middle finger. The rest of the butter in the container is smeared on the door frames. During these operations, the officiant intones “Dii ta likwahung w ohaak, ne getlaang w dore nti alsiye” (“Receive the butter from your cows and let it be good with our households”). If the rite is forgotten, it is believed that misfortunes and diseases will follow and the milk will have no butter.

c) Bala'ngw A'ben (New Crops)  There are rites connected with new food crops. Before cereals are used for food, special faa (porridge) is cooked and placed on both side of the horizontal door frames. Likewise bura-brew from new millet or eleusine is first poured both at the door and also around the two ufa. Prayers are made to the sky people as well as to Muk Yamu to accept the offering and thus bless the crops for the people who will use them for food and drink. The rite for basoro (millet) is more elaborate. Before the harvesting of basoro all households organize a dance known as niimariant. Raw cereal and porridge are sent to the tombs. The officiant puts the offering on every tomb and intones “lantorhung ohak hanos” (“Receive your new basoro”). The Iraqw hold that if the ritual is not performed, people will suffer from indigestion every time they eat basoro.

d) Gii  This is a ritual directed to the spirit of the dead and it is not performed for more than one spirit at a time. The Iraqw are, as a rule. stingy with their livestock and they seldom slaughter them for food. It is said that there came a clever man who devised a method of making the people reduce their livestock partly to check soil erosion and also to enrich their diet. He consulted a diviner who performed the Tlue Xu'ta (divination) and pronounced his findings to the people. Some misfortunes are attributed to a dissatisfied ‘Hee Yamu’ (singular for Muk Yamu) who is demanding sacrifice from the living relatives.

The sacrifice usually involve livestock and eleusine brew. The animal to be offered must not be a female beast but must be brindled. Before the killing, which is done in the morning, a tuft of grass called ‘barsir gitso’ is placed on the appropriate ufa. (3) When performing this act, the officiant says “Isa iseerek oheek” (“So and so receive your such and such”). They also repeat the formula during the killing which is done near the entrance to the cow shed. The animal is made to face north and laid down facing west. After the killing, the viscera, the head. hooves, some bones, and chunks of barbecued meat are wrapped in the hide and sent to the appropriate ‘ufa’ in the
evening. The spirit—‘Hee Yamu’ comes disguised as a hyena and carries the bundle away.

**Firro-Petitions**

The critical petitions addressed to Loa when some disaster threatens or is already a fact are known as *Firro*. The afflictions which go with such disasters range from human and livestock epidemics to natural disasters such as droughts. Such critical situations provide occasion for therapeutic rites which enable the participants to identify, expose and confront societal afflictions.

Firro—Free translation

Leader:    Tell them this:
            Please Mr. Sarmett I request you.
            That today we have met here.
            Usually we don’t get gatherings like this one.
            Tell them this:
            That the Iraqw used to say
            Our elders used to say in the old days
            That God is ever present in any gatherings;
            Whatever you have asked God
            Will never be lost
            Whenever a crowd for something
            That thing will always materialize in a good way
            Tell them this:
            Let us pray at this house
            By doing we shall also be praying for the whole land.
            Tell them that we want to purify our land
            Our land has been polluted.
            All people are in sleeping animal skins.
            People are sick.
Cattle are also sick.
The skin of the earth is also sick.
Let us all agree that the skin of the land get cool!!!

Crowd: Yes. let it cool. let it cool (i.e. be cleansed)
Leader: Let those in sleeping skins (hides) wake up immediately!!!
Crowd: Let them right now!!!!
Leader: Tell them this:
Tell my brethren this:
Including mothers and all, tell them to listen:
Tell them that today we have entered this house
There are reasons for entering this house
Tell them this:
We have entered this house because we have something to share
Tell them this:
We are trying to feast on this, but there is no peaceful
Way of enjoying it.
Tell them this:
One big thing disturbing us here is disease.
Tell them this:
This disease is troubling us yet we don’t know whether it is caused by
Loa or by man.
Tell them this:
If this disease has been inflicted on us by Loa then we ask for purifica-
tion.
Tell them this:
I beg you all who have gathered here now
Tell them this:
(N.B. Here the leader shouts and his listeners also reply loudly.)
If this disease is from Loa. then may its fire cool off!!!
Crowd: Yes. may it cool off!!!
Leader: Tell them this:
I repeat, I say if this disease is man-made
Tell them this:
If it is man-made then let us return it to him
Tell them this:
We have returned it to its owners but it never agrees.
Tell them this:
We shall never tire to return diseases to their owners.
Tell them this: Now all of you:
If this sickness is a spear by a man.
Please brethren let us return this spear to its owners (loudly)!!!
Crowd: (in unison) Yes! Return it to him!!!
Leader: Tell them this:
There exists a third thing which disturbs us.
Tell them this:
A third thing disturbing us is called "Operation"
Tell them this:
The Operation we know is the one done in Hospitals.
Tell them this:
We have never heard of the land being "skinned" or "operates"
Tell them this:
We don't know yet how to react to this new thing.
Tell them this:
There isn't any living elder who can give the best advice to
us about these strangers.
Tell them this:
Shall we pray that these people go back to their own lands or
what shall we say?
Tell them this:
Please bretheren let that spear get cool!!

Crowd: Yes. let it cool!!
Leader: Tell them this:
The fourth thing I wanted to say.
Tell them that. we are living in a season of September month
Tell them this:
We are begging this dry September month.
Tell them this:
On begging it we have this to say.
Tell them this:
That may it tie the ligament of both the peoples and the animals
Tell them this:
I want to say this to all the people who have gathered here
Tell them this:
We are with our September month
Tell them this:
Please bretheren may this dry September month
Tie the ligaments of all peoples and animals (loudly).
Crowd: Yes. may it tie them!!

Slufay—Thanksgiving

The extempore litanies that accompany recurrent annual events regulated by the
traditional almanac provide occasion for ceremonial rites. The compositions which
are celebrative and panegyrical constitute an elaborate catalogue of the anxieties,
hopes and desires of the people. This goes to reveal that these litanies are a recitation
and a commemoration of the traditional history of the Iraqw.

Slufay—Praise

Sufay—Praise—Free Translation

This is the scarifice for thanksgiving to Loa, to the dead and the living for their
participation in farming.

The time is morning / The dawn is small / The dawn is tiny
We are at it / They are at it / The women's crops
Let us eat them for food / Let us eat them for food
And the afternoon / We are matching it / We are matching it
Our lost animals / Let them return at day-time / Let them return at day-time
May badluck vanish / May our thresholds win / The Mbugwes / And us
We have intermarried our daughters / There are other foreigners: / Other foreigners
to exist,
The other ones / Those walking astray / Tomorrow's dawn. / Be like this one.
Something minute / Let it expand from our hand / Women's hands
May it increase from their hands / May it increase from their hands
Our elders / Grow a big layer of fat / And let them dine with it / And let them
fight with thieves
The Nyiramba's thieves / Let us inherit them / The crowd which has assembled
here / The crowd which has assembled here:
Bad people exist / Bad people exist. / Those who want goodness / Let us share
goodness.
The bad ones. / The bad ones; / Our bad person: / He hates us / He hates crowds /
He dislikes crowds.
Entering this house / This is the house of Gwandu / Gwandu Daa'ita / Of the
Gallet clan / Of the Gallet clan. / The clan of Wambugwe
The Wambugwe of the east, / We have intermarried our daughters. / Let us marry
each other's daughters / Let us marry each other's daughters. / Let us marry
each other's daughters.
The foreigners in the south / The foreigners in the south / The Irangi / The Irangi
They and us / Have married each other's daughters / Let us continue marrying our
daughters.
The Masai foreigners / We have failed with each other. / The Barbaig foreigners: /
Other foreigners exist / The Barbaigs.
They and us / Are marrying each other's daughters / Let their daughters listen to
our orders
Let them clean our cowsheds / Three times / Three times. / Today we are busy /
We are beginning a morning / A very tiny morning / A very tiny morning.
We are proceeding to day-time / Let our day / Let our day / Let our day-time /
Let our lost animals
May our cattle go grazing / Let our cattle graze peacefully in the hills. / May our
cattle go grazing / Let our cattle graze peacefully in the hills. / May our cattle
return peacefully from grazing.
The bitter grass / Be left in the bush / The sweet grass / Be brought home.
Our male teenagers and the cattle boys / Our cattle boys / And the birds who eat
ticks from cattle / Sing to our cattle / Sing to our cattle.
In the evening / Cattle are coming home: / Our women / And our cattle / And
our calves / Near the cowshed poles / Clash over each other / Clash over each
other.
Our male teenagers / Go to receive our cattle / Break the tedious meanders / The
wet ditches and angled paths, / Be broken.
The cattle boys drop the arrange tails on the cattle's backsides / The cattle boys
drop the arrange tails on the cattle's backsides. / Their armpits collect things.
May all bad lick avoid us / May screams of alarms disappear / May screams of
alarms disappear / May screams of alarms disappear.
The mouths of holes. / May the mouths of holes be twisted. / May the mouths of
thorns fall upside-down / The hater of gatherings / Who turns against this house
with a bad eye.
If you are an elderly man / Or an old woman / Who wants to nurse grandchildren. /
Or if it is a woman bearing children,
Looking at this house with a bad eye / Causing conflicts amongst people / Causing conflicts amongst people / Causing conflicts amongst people,
If it is a young girl, a maiden / If she is black or dark-brown / If she is dark-brown / Will you follow
The footpaths of animals / Of red wild animals / Of red wild animals / If she is black / If she is black. / May the hearth remain empty / Fall in the fallow, in the middle of a fallow.
If it is a boy-teenager, / May you take your things and weapons / Go in the bush hunting with your agemates / But may your agemates return only with your weapons.
May ants turn your skull into a drum / The teenagers of ants / And of vultures / Use your skull and drinking jug.
If it is an old man / You are looking with a bad eye.
This house of Gwandu / Our male teenagers / Let them scramble over the girls in other countries
We live in Sabilo / Let us live in it seriously / May we process a surplus of castrated bulls / So we may also mark our calves / Our boys our boys.
Graze our cattle together with Masai boys / The Masai boys. / Let them overcome / Let them drop their swords / Let own women pick up these dropped swords
So they may cut pumpkins with them / And win by using them. and win by using them / And their elders with ours / And their elders with ours
Let them debate in councils / May the Masai elder fail disastrously / May our elder confiscate their ornaments / And debate with them
A Masai elder women / Let her pick lice with it / And may our elder women be victorious
Let their elder woman fail to pick lice / Let our elder woman inherit Masai garments / And use them for covering her grandchildren / And let them avoid us.
You are hating the people in this house / You dislike people. / If it is a visitor. an elder, passing-by
The elder of this country, looking with bad intentions / May your room remain vacant, / May fleas inherit it / May other animals scratch it / As if to cure you.
If it is an old woman who wants to nurse children. / Your are on your bed / May you fall under your bed.
If it is a woman still producing children / Yet she is disliking crowds. / Yet she is disliking crowds.
And you are looking disapprovingly at this house / You are also causing misunderstanding between people / Yet you want to produce children
May the pain kill you / The pain of women in labour / The agony of women in labour / May your crise echo
In the caves of mountains / In the three mountains / The three mountains called cooking stones.
May your hearth stay without bed-poles / May your hearth stay without bed-poles / May your hearth stay without bed-poles.
If it is a teenager. / Or a traveller on the path. / Looking disapprovingly at this
house / Looking disapprovingly at this house. / He wants to watch strifes.
If you have a shield on your way / May it turn upside down: May it turn out­
wards / May vultures shit on it / May the hawks drive on it / May the hawks
drive on it.
Tell the vultures to watch this traveller / Looking at him from behind, / Pull his
tongue through the back of his head
Because he dislikes gatherings / Tell the hyena that he is a Hhawu / Look at this
sleeping man / He is dying of cold, please cover him with your robes
You have robes / Your robes in your tail / You eat ash / You eat ash / You live in
houses.
Those who want goodness / Let us share goodness / People love each other
Like the body and clothes / Like honey and water / Like honey and water / Like
honey and water
Like the foot and the shoes / Like the pestle and the mortar / Like the pestle and
the mortar / Everybody to cordial to others / Everybody to cordial to others.
We are at the period / The period of September / May our September produce
early / When it is producing.

CONCLUSION

The annual and the seasonal rites of the Iraqw, according to C. B. Johnson, mark
them off from their Bantu and Nilo-Hamitic neighbours. The “rites are mainly per­
formed to obtain rain, to keep diseases, plague and other evils away, or to stop them
if they have already entered the country” (Johnson, 1966). It is pertinent to the con­
cerns of this paper that tribute has been paid to the sublimity of diction exemplified by
the extempore oral compositions which are part of the performance of the rites. Re­
calling the poetry of the Bible from habit and upbringing, and confronting the actual­
ized delivery of Firro and Slufay, Johnson concludes. “It would be hard to find more
beautiful words in the Bible!” (Johnson, 1966).

Katsuyoshi Fukui (Fukui, 1970) has taken note of the solemnity which character­
izes the harvest and the ushering in of a new agricultural season. Shohei Wada, how­
ever, seeing the potential of the ritual texts as historical sources. declares them “an
abstract expression of the tribal history. It relates the history of their expansion and
col-existence with other tribes” (Wada. 1969). The thrust of the discussion of these
scholars of the Iraqw culture, is on the rites as instances of poetry. This, of course.
is to submit that the verbalized accompaniments to the rites are chants. The chants
of Firro and Slufay are, however, not mythological but realistic recitations of tribal
hopes and anxieties. These chants are distinguished by procedures and conventions
which provide rhythmical movement to what would remain ordinary language. The
procedures and the conventions constitute the form that is taken over by successive
generations and becomes the frame into which words are fitted during ritual occa­
sions.

The verbal texts accompanying the calendrical and critical rituals provide an appro
appropriate ground for discussing and exposing the texts as examples of Iraqw traditional poetry, and a genre of oral literature.

_Firro_ falls under the critical petitions which deal with immediate problems facing the people. The length of the text depends on the number and magnitude of the problems, and the words are not in a set order. Furthermore, the texts are composed and improvised to be congruent not only with the specific problems but are identified also with a specific geographical locale. The spokesman who leads the proceedings represents the assembly as he acts as their collective voice and presents their petitions to _Loa_.

The mode of delivery is also worth attention. The people's collective longings, wishes and fears are spelt out through allusion or by direct address. The spokesman having exposed the evil, employs a barrage of similes and metaphors to dramatize its effects, as he exhorts the assembly by verbal exclamations and physical gesticulations to join him and with concerted effort will the evil go away. That particular evil being cast out, the spokesman unfolds a catalogue of other evils threatening the people. The problems constitute thought groups or compositional units, and the climactic sanctioning by the assembly prepares the audience for a smooth transition to other issues.

The Iraqw, unlike their Bantu and their Nilo-Hamitic neighbours, do not live in clan clusters. Thus one's next door neighbours are strangers. In such a set up, personal and public safety are ensured through an inbuilt code of mutual respect and personal regard. The tribal ethic enjoins people to maintain goodwill among themselves to ensure good luck—which is progress. Thus to avert disaster, and in order not to disturb the much prized harmony, people not only wish each other success but also behave in such a way as to realize the good they all desire. Consequently, a person has to know both his rights and obligations and also the rites connected with them. In the _Sli'fay_ litanies, allusions are made to the ongoing activities in the society, but the emphasis falls on the pursuit for happiness and prosperity. The texts, besides their ritual functions and significance, infuse the listeners with verbal potency to triumph over the neighbouring tribes. In this respect, the texts reveal something of the history of the tribe. We can discern the conditions under which the society has evolved, how people behaved and acted towards one another, toward their friendly as well as hostile neighbours and how to maintain peace which accounts for the progress achieved.

These thanksgiving calendrical and celebrative events mark the end and the beginning of a new season. They provide an opportunity for a renewal of the ritual contract and a maintenance of the social structure. Over the years the verbal texts have come to dissociate the ritual import and become the way of saying and hearing of expected things at important gatherings.

Social gatherings among the Iraqw centre around the flow of the events in which words anticipate and animate each other. Through repetition of certain key words, traditionally fixed expressions and concepts, themes are developed and are aurally reinforced. Through parallelism and the use of antithesis, diverse traditional similes and metaphors issue in habitual collocations which become the poetic thread of the chants. The word _crowd_ for instance, in these chants collocates with audience._assem_
bly. people and hence with the Iraqw. Thus:
The crowd which is assembled here / The crowd which is assembled here:
Bad people exist / Bad people exist
Those who want goodness / Let us share goodness
The bad ones. / The bad ones:
Our bad persons / He hates us / He hates crowds / He dislikes crowds.

The Iraq\’ have a saying, “Nothing goes wrong in a gathering”. This suggests that while opportunity for discussion lasts. peace and prosperity are assured. As long as individuals see themselves as part of the community. the people’s sense of belonging or identity can be maintained. Otherwise. if selfishness and individualism flourish. the community will disintegrate because of inner contradictions. Thus:
The hater of gatherings / Who turns...with a bad eye,
If you are an elderly man / Or an old woman....
Causing conflicts amongst people / Causing conflicts amongst people....
If it is a boy-teenager / May you.... Go in the bush hunting.... / But may your
agemates return only with your weapons.
May ants turn your skull into a drum / The teenagers of ants.
And of vultures / Use your skull as a drinking jug.

Repetition in these chants as an analogical method serves to impress upon the listeners the importance of what is being said. It also confines the reciter to the tradition of Firro and Shifay in which lexical congruity and habitual collocation issue in verbal satisfaction as the reciter voices and the audience hears the expected word.
Let there be love amongst ourselves / Like the hand and the mouth. / The hand
and the stick / The leg and the shoe,
The body and clothes / The body and clothes / Our land be full / Our land be full
Our land grow fat / Like the tail of a ram

Repetition determines and maintains the speed of the delivery of the chants. and forges thematic unity by insistence.
There are other foreigners / The eastern foreigners.
The Mbugwe father / And our father
Let them pull a tug of war / Let them pull a tug of war
Let our father win / Let us reign over all the foreigners / Let us reign over all the foreigners.

These and such lines, besides indicating tribal rivalry. insist on the necessity and importance of improvement and development in the economic and social spheres in order to triumph over their neighbours.

Allusion to locally fixed references add to the beauty of the poetry. The mention of proverbial personages like Kayto Lakay in an attempt to encourage and organize competition among themselves is complemented elsewhere by evoking the renown of Manda. This clan is known for its rain makers and it is therefore easy to see the connection between livestock and agricultural development being aided by timely rains.
If rain is essential to their prosperity, intermarriage with the surrounding peoples is just as essential for peace, and it is expected and accepted.

It is interesting to note that the four points of the compass are not mere reference points. They are in fact invested with significance, which once grasped, enriches appreciation of the poetry. East, for instance, points to a person or a group which has gone out of the tribe and acquired alien cultural values. To go east for the Iraqw is to repudiate their own people and thus become alienated from them. The north points to their traditional enemies the Masai with whom they have not intermarried, for as they say “We have failed each other”. The south refers to the Barbaig with whom there is considerable mixing. The west denotes the Nyiramba and Turu people who are held in low esteem by the Iraqw, for they were often hired to perform the menial tasks in Iraqw households.

The Iraqw, as John Burra puts it, “value cooperation and peace among themselves and therefore, they did not only encourage friendliness but prayed for it, too” (Burra, 1985). As a result “Sufulya” was recited. John Burra emphasizes, whenever people met as a group. These traditional litanies are actually an activity of the entire community of which they realistically pass judgement on the quality and purpose of life. The community participates in the drama of social welfare by acclamations of assent and by repudiation of undesirable behaviour through the spoken word. The facts of the Iraqw life are enumerated and displayed in these verbal feasts for moral and practical education. For the Iraqw speech calls forth and accomplishes social tasks and thus manages social life since:

“Life consists of propositions about life.
The human reverie is a solitude in which these propositions torn by dreams, by the terrible incantations of defeats and by the fear that defeats and dreams are one.
The whole race is a poet that writes down
The eccentric propositions of its fate” (Stevens).

ACKNOWLEDGEMENTS Tahhani Haali, Aloys Margwe and John Burra gave me an untiring help during the research and interpretation of the material for this paper. To them, and to the Research and Publications Committee of the University of Dar es Salaam, I acknowledge indebtedness.

NOTE

(1) In Aya Iraqw two special cow dung heaps are to be seen some distance away from the house. These heaps are supposed to contain all the dung from the entire herd that the family possesses. When a married man dies he is buried beside the right-hand side ufa and a woman on the left hand side ufala.
