HISTORICAL SURVEY OF THE INSTITUTE FOR CHEMICAL RESEARCH

The history of the Institute for Chemical Research may be traced back to the Special Chemical Laboratory, founded in 1915, under the supervision of the late Dr. M. Kuhara, as a part of the College of Science, Kyoto Imperial University, to meet the urgent need for the necessary chemicals such as salvarsan, the way of importing them having been cut off during the First Great War. After the death of Dr. Kuhara, Dr. Y. Osaka was appointed his successor till he resigned in 1920, and the late Dr. K. Matsumiya succeeded him. In 1926 the budget for extending the Laboratory passed the 51st Diet.

Meanwhile, it had been the sincere desire among the authorities concerned, to enlarge this Laboratory to a more complete organization so that the researches of various branches of chemistry might be carried out in wider extent. Finally, the Institute for Chemical Research of the Kyoto Imperial University was established in October 4th, 1926 by Imperial Ordinance No. 313, and the former Laboratory was amalgamated with this organization. The buildings together with the necessary equipments having been prepared in Takatsuki, the first step was taken under the direction of the late Dr. M. Chikashige.

Since then, during more than two decades, Dr. G. Kita, Dr. S. Horiba, Dr. K. Kondo and Dr. R. Nozu have successively been appointed directors of the Institute, until the present director Dr. S. Uchino took charge. The results of various investigations read at the periodical meetings of this Institute were published in the "Bulletin of the Institute for Chemical Research": Moreover seventy-nine inventions have already been registered in the patent-ledger, some of them enjoying high reputation throughout the country.

At present, the Institute consists of twenty-six laboratories, of which eleven are in Kyoto and fifteen in Takatsuki. These laboratories are now endeavouring to keep up their activity in chemical investigations, in spite of the difficulties due to the war, and hope to contribute not only to the restoration of Japan, but also to the prosperity of mankind.

INSTITUTE FOR CHEMICAL RESEARCH

Director
Senji Uchino

Members of Council

Kiyoshi Abe	Rempei Goto	Hideki Hirata
Masao Horio	Katashi Inoue	Yoshiyuki Inoue
Masayoshi Ishibashi	Tatsuo Kariyone	Hideo Katagiri
Kiichi Kimura	Ren Kimura	Shinjiro Kodama
Kinsuke Kondo	Risaburo Nakai	Ryuzaburo Nozu
Ryohei Oda	Kikuo Ogiu	Ichiro Sakurada
Nobuji Sasaki	Ikutaro Sawai	Hiroshi Sawamura
Keiichi Shishido	Isamu Tachi	Seishi Takagi
Sankichi Takei	Hideki Yukawa	

Editorial Advisers

Masao Horio	Katashi Inoue	Ryuzaburo Nozu
Sankichi Takei	Senji Uchino	

Editors

Junzo Ebihara	Kiichi Kimura	Masao Mine
Shigeki Mori	Risaburo Nakai	Eiji Suito
Gisaburo Tabuchi	Hajime Tomono	Masatoshi Tsuda

Treasurers

Takeo Gyobu	Shin Terai
-------------	------------

CONTENTS

Reviews

1. Project of Study on the Manufacture of Pulp on Semi-Commercial Scale. *Masao Horio* 1
2. The Recent Applications of the Radioactive Isotopes for Chemical Researchs. *Shizuo Ueda* and *Kazuo Nishizawa* 7

Original Reports

1. Measurement at the Coefficient at Friction by the Photo-elastic Method. *Yoshiaki Uemura*, *Munezo Takai* and *Kenzo Takemura* 15
2. Study on Surface Electricity (VIII). *Shizuo Ueda*, *Akira Watanabe* and *Fukuju Tsuji*. 23
3. Detonation Velocities of Gas and Solid Explosives. *Rempei Goto* and *Nishio Hirai* 28
4. Photochemistry of Cellulose (I). *Chugo Kujirai* 35
5. On Aromatic Antimony Trichloride Complex (III). *Hajime Tomono*. 45

Abstracts of Papers

41. On the Delayed Coincidence Circuits (I). *Takeo Hayashi*, *Yoshihide Ishizaki*, *Kiyoshi Nishikawa* and *Kiichi Kimura* 51
42. Measurement of the Coefficient of Friction by the Photo-elastic Method (1). *Yoshiaki Uemura*, *Munezo Takai* and *Kenzo Takemura* 52
43. Operation of an Electron-multiplier. *Sakae Simizu*, *Hidekuni Takegoshi*, *Hideko Nishimura* and *Nariyoshi Ogura* 53
44. Electron Bombardment Conductivity of (BaSr)O (II). *Kiichi Kimura* and *Kyozo Ohira* 53
45. On the Characteristics of Ionization Chamber with Screen-Grid (I). *Kiichi Kimura*, *Kazunori Yuasa*, *Sukeaki Yamashita* and *Ryutaro Ishiwari* 54
46. E_p - I_p Characteristic Curves of Magnetron. *Kiichi Kimura*, *Isao Kumabe*, *Tetsuro Nakata*, *Hidero Ueyanagi* and *Asao Kusumegi* 55
47. Trial Manufacture of Electron Accelerator. *Kiichi Kimura*, *Isao Kumabe*, *Tetsuro Nakata*, *Hidero Ueyanagi* and *Asao Kusumegi* 56

48. On Some Properties of 2π -type Counter (II). <i>Yoshiaki Uemura, Yoshio Saji and Sakae Shimizu</i>	56
49. Study on the Ion Source. <i>Bunsaku Arakatsu, Yoshiaki Uemura, Sinjiro Yasumi, Masakatsu Sakisaka and Syoichi Miyasiro</i>	57
50. On Some Device of the Gas Leak Apparatus for Measuring the Pumping Speed. <i>Yoshiaki Uemura, Masakatsu Sakisaka and Syoichi Miyasiro</i>	58
51. Study on Clay (III). Dielectric Properties of Mud Pastes under Alternating Field of Low Frequency. <i>Kiichi Kimura, Yoshiaki Uemura, Takuji Yanabu and Toshio Yoshida</i>	58
52. The Quantitative Determination of Chromium in Sea Water. <i>Masayoshi Ishibashi and Tsunenobu Shigematsu</i>	59
53. Studies on Fishscale of Porcelain Enamel. <i>Ikutaro Sawai and Megumi Tashiro</i>	60
54. The Inner Structure of the Calorized Layers on Carbon Steel. <i>Masashige Koyama and Takashi Ishii</i>	61
55. On the Desulfurization in the Hearth of the Blast Furnace. <i>Hiroshi Sawamura and Daijiro Kitamura</i>	62
56. A Study on the Decarburization of White Cast Iron (I). <i>Shiro Morita, Akira Ono, Toshikazu Sakai and Tatsuya Ogawa</i>	63
57. Method of Quantitative Analysis of Nitrogen Contained in Cast Iron (V). <i>Hiroshi Sawamura, Masatoshi Tsuda and Keiji Omura</i>	64
58. Influence of Slag especially of Al_2O_3 and TiO_2 in Slag upon the Structure and Mechanical Properties of Cast Iron (III). <i>Hiroshi Sawamura and Masatoshi Tsuda</i>	65
59. Influence of Slag especially of Al_2O_3 and TiO_2 in Slag upon the Structure and Mechanical Properties of Cast Iron (IV). <i>Hiroshi Sawamura and Masatoshi Tsuda</i>	66
60. Studies on the Cuprammonium Hydroxyde Solution of Cellulose (I). On the Degradation of Cellulose in the Solution. <i>Masao Horio, Makoto Kurita and Yuichi Komura</i>	67
61. The Correlation among the Viscosity of Solution, the Concentration and D. P. of Cellulose (II). <i>Masao Horio, Makoto Kurita and Yuichi Komura</i>	68
62. Studies on the Reactivity of Dissolving Pulp. <i>Yusaku Fukuda, Tsutomu Hatanaka and Satoshi Tsunoda</i>	69
63. Studies on the Application of Ketone Resins (VII). Application of Acetone Formalin Resin as Adhesives (6). <i>Yasuaki Kozai</i>	70

64. The Study on the Reaction of Acetylene under High Pressure (II). Preparation of Unsaturated Higher Aldehydes. <i>Junji Furukawa</i> and <i>Nobuho Saito</i>	71
65. Kinetics of the Decomposition of o-Hydroxyphenyl Mercuric Halides with Hydrohalogenic Acids. <i>Katsuhiko Ichikawa</i> , <i>Tadashi Mizoguchi</i> and <i>Haruo Shingu</i>	72
66. Studies on Solvation (I). Swelling Velocity of Starch and Lyo- philic Property. <i>Nishio Hirai</i>	73
67. On the Kinetics of the Activated Adsorption (II). <i>Noriaki Kadota</i> and <i>Shinjiro Kodama</i>	74
68. Studies on the Velocity of Copolymerization (II). On the Pheno- mena that the Copolymerization Stops at Very Low Conver- sions. <i>Seizo Okamura</i> , <i>Takao Yamashita</i> and <i>Masako Tsuchiya</i>	75
69. Macropolymerization of Ethylene (VI). Copolymerization of the Ethylene with the Isobutylene. <i>Shinjiro Kodama</i> , <i>Isoji Tani- guchi</i> and <i>Tadashi Zenbutso</i>	77
70. X-ray Studies on the Aging of Poval-filaments. <i>Kiyoshi Hira- bayashi</i> and <i>Fumihide Fujimoto</i>	77
71. Aging Phenomena in Poval-filaments. <i>Kiyoshi Hirabayashi</i> and <i>Yasuo Sone</i>	78
72. Crystal Structure of Polyvinyl Alcohol. <i>Ichiro Sakurada</i> , <i>Keiroku</i> <i>Fuchino</i> and <i>Noboru Okada</i>	78
73. Studies on the Correlation between Chemical Constitution and Insecticidal Activity of Halogenated Aromatic Compounds (V). Studies on the Chlorinated Compounds of BHC. <i>Masayuki</i> <i>Hamada</i> , <i>Toshihiko Oiwa</i> and <i>Minoru Ohno</i>	79
74. Studies on the Molecular Structures of BHC and its Related Com- pounds (11). On the Molecular Structure of γ -Monochloro- benzene Hexachloride. <i>Toshihiko Oiwa</i> , <i>Ryoichi Yamada</i> and <i>Minoru Ohno</i>	80

編 輯 後 記

本年より季刊として発足することになつた化学研究所報告は予定の如く茲にその第4冊を発刊する運びとなつたことは洵に同慶にたえない。既刊の報告は國內並に國外に於ける有力なる研究機関に寄贈を終え、又相当数の外國の刊行物との交換も行われるようになり、益々將來の發展が期待されて居る。

次号第24集は明年3月発刊の予定で、綜報として西原教授の戦後我國冶金界の展望、原報として上田、友野、鯨井及後藤氏等の報文及本年11月23~26日の3日間高槻で行われた化学研究所業績発表講演会に於ける講演要旨の一部を掲載することになつて居る（森）
