#### History of Publications

Term		Vol.	Title	Published
Jan., Dec.,	1929– 1947	1–16	化学研究所講演集 (The Reports of the Institute for Chemical Research)	Indeterminately
April,	1933	_	10 Jahre Institut für chemische Forschung (化学研究所創立十周年記念号)	
March, Dec.,	1949- 1949	17–19	化研講演集 (The Reports of the Institute for Chemical Research)	Indeterminately
March, Sept.,	1950- 1952	20-30	化学研究所報告 (Bulletin of the Institute for Chemical Re- search)	Quarterly
Dec.,	1951	_	The Commemoration Volume for the Silver Jubilee (化学研究所創立二十五周年記念号)	
Jan., onwards	1953	31 No. 1-	Bulletin of the Institute for Chemical Research (化学研究所報告)	Bi-monthly
Nov.,	1966	44 No. 6	Special Issue on the Commemoration of the Fortieth Anniversary (化学研究所創立四十周年記念号)	
Nov.,	1976	54 No. 6	Special Issue on the Commemoration of the Fiftieth Anniversary (化学研究所創立五十周年記念号)	_

柳 父 琢 治 教 授 Professor Dr. Takuji Yanabu

#### Professor Emeritus Takuji Yanabu

On the first of April, 1982 Dr. Takuji Yanabu retired, having completed 35 years of service, from the Kyoto University. He was granted the title of Professor Emeritus by the Kyoto University on the following day.

Prof. Yanabu was born in Hiroshima on March 11, 1919. He was graduated from the Department of Physics, Kyoto University in 1942. After he served as a navy technical officer for 3 years until the end of World War [[, he became a research associate of the Institute for Chemical Research, Kyoto University in 1947, majoring in experimental nuclear physics under the supervision the late Professor Bunsaku Arakatsu.

In the Arakatsu Laboratory, he worked on the  $\beta$ -decay of  $^{32}P$  with a cloud chamber and aslo tried to construct a small betatron. In 1951 he began to construct the 105 cm Kyoto University Cyclotron with colleagues of Professor Kiichi Kimura Laboratory. He mainly devoted himself to the design and construction of the main magnet of the cyclotron. This project took 4 years to be completed with success of proton beam extraction in December 14, 1955.

In July, 1957, he was promoted to an associate professor of the Institute. After completing the radiation shieldig for the use of the cyclotron, he began to work on the study of experimental nuclear physics with beams from the cyclotron. His first work on this period was the study of  $(d, \alpha)$  reaction on  $^{16}O$ ,  $^{14}N$  and  $^{12}C$  with 15 Me deuterons and he received a doctoral degree of science from Kyoto University for this study in 1962.

In due course of this study, he was interested in the cluster structures of light nuclei and continued extensive research works to understand alpha-cluster structures of nuclei with various nuclear reactions including quasi-free alpha scatterings.

In February, 1966, he was appointed a full professor of nuclear reaction at the Institute for Chemical Resesarch of the Kyoto University and directed the Laboratory of Nuclear Reaction. Since then, he made many distinguished studies, especially on few-nucleon reactions as well as nuclear structures in light nuclei and supervised the dissertation works of many graduate students.

He also took the leadership for the reconstructino of the Kyoto University Cyclotron in 1969, finishing it successfully in 1971.

He has served as a member of a number of committees in the University to promote research, especially in the fields of atomic energy and radio isotopes. He gave sincere efforts to develop a new research facility for the general and wide use of particle accelerators in Kyoto University. He has also made much contributions to the foundations and organizations of the joint research institutes for nuclear and high-energy physics (Research Center for Nuclear Phsics, Osaka and National Laboratory for High Energy Physics. Tsukuba) which are now commonly utilized by many university researchers in Japan.

His sincere, thoughtful and warm hospitality is respected by friends, colleagues, students and all those who come in contact with him. This collection of papers con-

tributed by his friends, colleagues, and students, is dedicated to Dr. Yanabu in honor of his memorable retirement.

Toshio Takada

Director

Institute for Chemical Research

Kyoto University

#### **CONTENTS**

### Commemoration Issue Dedicated to Professor Takuji Yanabu on the Occasion of His Retirement

Toshiyasu Higo, Yoshihisa Iwashita, and Seishi Matsuki: A Plunger System for
the Recoil-Distance Doppler-Shift Life-Time Measurements of Nuclear
Excited States181
Masaharu Yasue, Kazuo Omata, and Kunio Kamakura: A Utility to Use Core-
Resident Tasks in Overlay Structre
Notes
Ryozo Tamagaki: A Note on Repulsive Core of Nuclear Forces from Quark-
Model Point of View190
Hiroshi Sakamoto, Masanobu Nakamura, Kichiji Hatanaka, Tetsuo Noro, and
Shinsaku Kobayashi: Inclusive Proton Energy Spectra from the Deuteron
Induced Reaction on Carbon at Ed-9. 0 MeV197
Hidemi Ogawa, Masanobu Nakamura, and Shinsaku Kobayashi: Energy Depen-
dence of the Optical Potential for Proton Scattering from Si200
Yoshitaka Fujino, Mikio Hyakutake, and Isao Kumabe: Activation Cross Sections
of Zirconium and Molybdenum Isotopes for 14.6 MeV Neutrons205
Katsuya Fukuda, Keiichi Matsuo, Shigeki Shirahama, and Isao Kumabe: Activa-
tion Cross Sections for Reaction Leading to Long-lived Reaction Products
on Iron, Cobalt, Nickel, Zirconium and Molybdenum for 14.6 MeV Neutrons208
Kazuhiro Kayashima, Akihiro Nagao, and Isao Kumabe: Activation Cross Sections
for Reaction Leading to Long-lived Reaction Products on Titanium, Man-
ganese, Copper, Zinc, Strontium, Yttrium, Cadmium, Indium and Tellurium
for 14.6 MeV Neutrons211
Yoshinori Kanamori, Yoichi Haruyama, Akio Itoh, Teruo Kido, and Fumio
Fukuzawa: Effective Charges of Neutral Atoms in Distant Collisions214
Reviews
Akira Masaike: Topics on High Energy Spin Physics-Nucleon Polarization and
Multi-Quark Resonances217
Asao Kusumegi: Total Absorption counter and Viewing Shield by the Use of
Heavy Liquids234
